Higgs boson measurements in couplings to quarks and leptons with the ATLAS experiment

Thursday 26 August 2021 16:00 (20 minutes)

Testing the Yukawa couplings of the Higgs boson to quarks and leptons is important to understand the origin of fermion masses. The talk presents several new measurements in Higgs boson decays to two bottom quarks or two tau leptons, searches for Higgs boson decays to two charm quarks or two muons, as well as indirect constraints of the charm-Yukawa coupling. The production of Higgs bosons in association with top quarks will also be discussed. These analyses are based on pp collision data collected at 13 TeV.

Author: KOREN, Guy (Tel Aviv University (IL))

Presenter: KOREN, Guy (Tel Aviv University (IL))

Session Classification: Electroweak, Top quark, and Higgs Physics

Track Classification: Electroweak, Top quark, and Higgs Physics
