

FTS Community Talk: CMS

Tuesday 28 March 2023 09:55 (30 minutes)

This presentation will describe the usage of FTS by the CMS experiment at the Large Hadron Collider during the start of Run-3. I will describe the particular features recently developed for, and employed by CMS for our unique user case as well as current challenges and efforts to optimise performance on the boundary between FTS and Rucio. I will also discuss the future transfer requirements of CMS.
