

AG 2020-01-20

COC website

Actual state

- Hosted at CERN, on Drupal7
- Drupal7 will be unsupported in mid-2020
- Can go to Drupal8.. but
 - Some steps need manual actions ('Views', e.g Results)
 - Migration seems to be not straightforward
 - (see Canoe-Club site)
- = good time to reconsider?

How did we get here?

- Old website by Pierre Charrue
 - Site still exists - <http://club-orienteer-old.web.cern.ch/default.html>
 - Has results 2004-2016, photos 2000-2010
- DFS + Framemaker (initially)
- 2011+ 'manually' updated - via notepad..
 - Goal was to have Excel calendar also on Web
 - Shared between Pierre & Jan, ..2016
 - One.. two edits/week (add next event before mail, add results – 'fast')

New website in 2016

- Done by Edvins
 - (some admin things by Jan)
- Goal: Content Management System
 - No more ‘edit HTML directly’
 - Could share web editing with organizers
 - But: needed login/accounts/EGroups..
- Had considered Wordpad, but Drupal was available at CERN, and looked OK
- Initially had only the calendar (also exported to INDICO!)
- New site took over ‘official’ main URL in Aug 2017

Criticism?

- Overall functionality is OK: Events, results, photos, some extra pages
- But: Anything but 'edit event' / 'upload result' is complicated..
 - Structured: no “random files” upload
- Ugly graphics
- Bugs ..
- Half-bilingual
- Did not get ever rid of 'Flyers', or Excel/PDF calendars
 - Most data entered 3 times: Excel, Event, Flyer

Should we use something else?

- Less complicated?
- “Nicer”?
- More flexible?
- Choices:
 - CERN-supported
 - CERN-hosted
 - External (free or for-\$\$\$)
- Caveat: might leave old content behind!

And the others?

O-Jura	https://ojura.org/	Wordpress
COLJ	http://www.colj.ch/	WebAcappella
CARE Vevey	http://care-vevey-orientation.ch/	Wordpress
Arve'nture	http://arve-nture.e-monsite.com/	e-monsite.com
SATUS	http://www.satus-geneve.ch/	Joomla
ANCO	https://www.anco-ne.ch/	Wordpress

I.e mostly CMS, with some preference for Wordpress
(CERN only has prototype sites with that..)

Discuss & decide

- What do we want from the website?
- How do we want to handle changes?
- By default:
 - Try Drupal8 migration – before spring2020 (if OK).
 - No other (major) changes
