

EuroHPC planned resources and timelines

3-4 x petascale machines @ 15-30 petaflops. In operation by July 2020. Sites chosen already.

3 x pre-exascale machines @ 150 petaflops (approx, theoretical peak). In operation by end 2020. Sites already chosen:

1. Lumi
2. BSC
3. Cineca

2 x exascale in operation by 2022-2023. In coordination with EPI (ie European-based technology) for at least one machine?
