Current website/repository status

- Pythia public main page in Lund
  http://home.thep.lu.se/Pythia
- Pythia private gitlab docs page partly overlaps
  https://gitlab.com/Pythia8/docs
  (has legacy Doxygen, not talks)
  and neighbouring to 8.3 code & manual development areas
- Docker images and Jupyter notebooks on
  http://dire.gitlab.io/Docker/
- Hepforge legacy 8.2 development,
  mail to developers, announcement list with 188 followers
- No place for (internal or external) bug logging
- No FAQ repository
- No article links
- Little integration html manual with PDF physics

Website

Webpage style:

- Static, like current Lund one
- Modestly evolving from current
- Move to GitLab
- Move to something else

Webpage host:

- remain with thep.lu.se
- gitlab.com, i.e. commercial USA site
- gitlab.cern.ch: requires CERN account?
- gitlab.hepforge.org: would that happen?
- gitlab.thep.lu.se: requires local expertise/support

Need Webmaster!

Website management and access

- Forked repositories (Vincia)
- External access, e.g.
  Dmitri Konstantinov, Grigory Latychev: speedup code
  Josh Bendavid (CMS): make code requests within gitlab
- How closely related public and private areas?
- . . .
