# WHAT is FECOS?

## ■ Google says...

The screenshot shows a Google search interface. The search bar contains the text "What is FECOS?". Below the search bar, it indicates "About 2,690 results (0.10 seconds)". On the left side, there are navigation options: "Everything" (selected) and "More". Below that, there is a section titled "The web" with a link to "Pages from Switzerland". The search results section shows "Results for: What is FECOS?". The top result is a link titled "French Embassy Complex of Shame (FECOS) page - 2nd July, 2000 ..." with a star icon. The description below the link reads: "Official webpage of 'The French Embassy in London': also known as the 'French Embassy Complex of Shame (FECOS)' - http://www.ambafrance-uk.org/ ...". Below the description, there is a link to "lachlan.bluehaze.com.au/london2000/london2000\_02jul.html - Cached - Similar".

## ■ ... well, MA FECOS is something else 😊

# WHAT is FECOS?

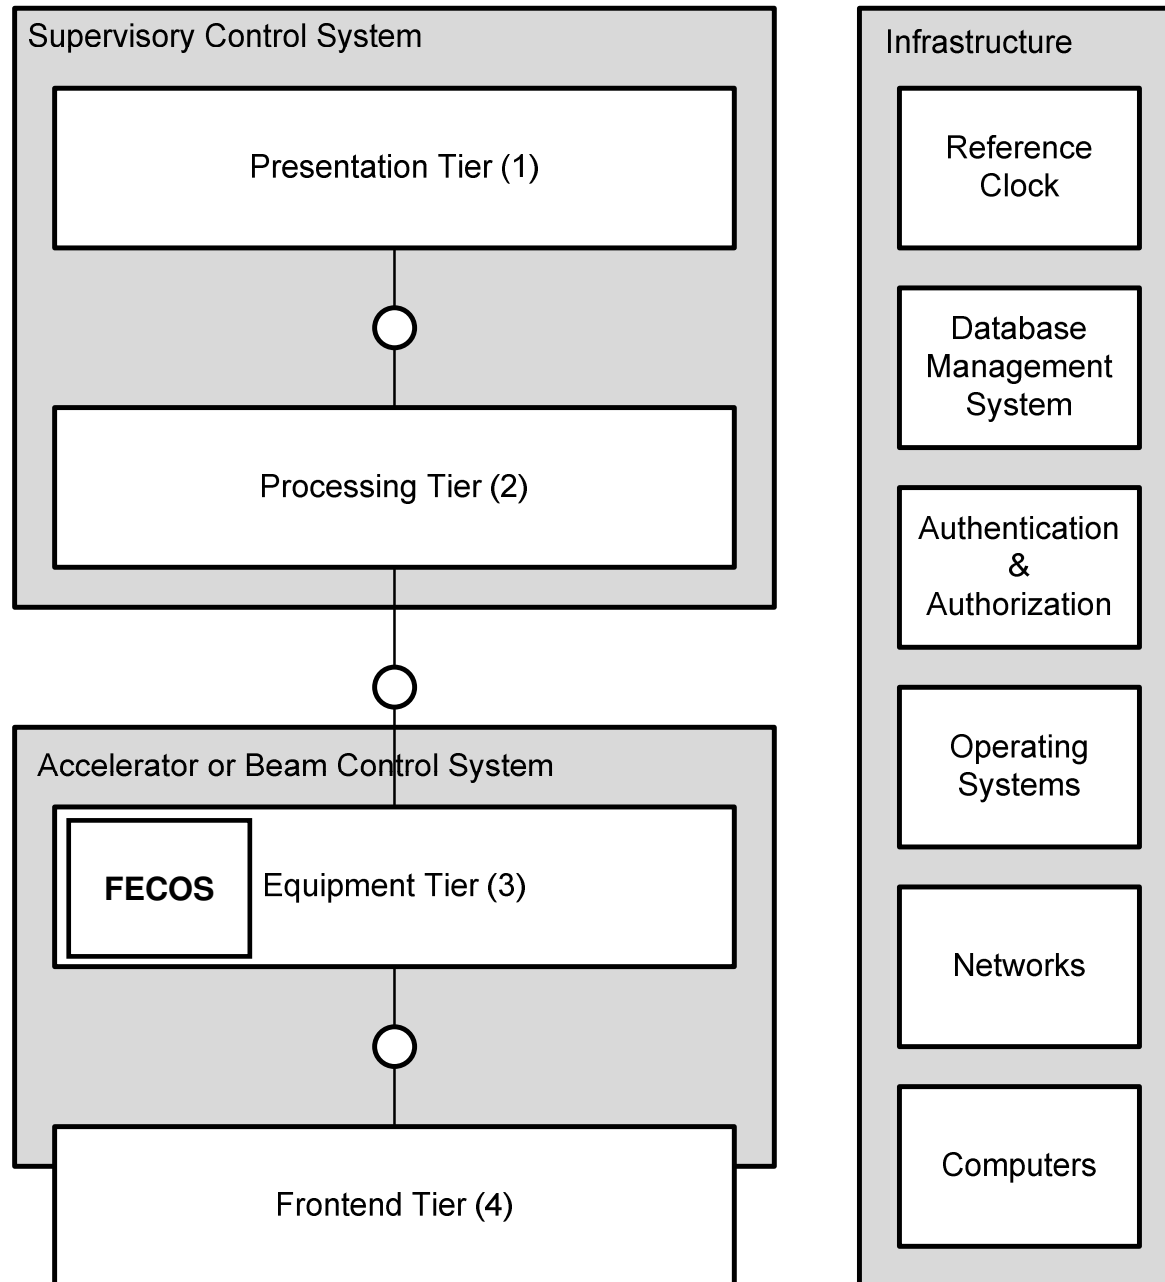

- **Front End Control System**
  - purpose built NI LabView Real-Time framework

LabVIEW  
**Real-Time**  
Graphical Development,  
Real-Time Results

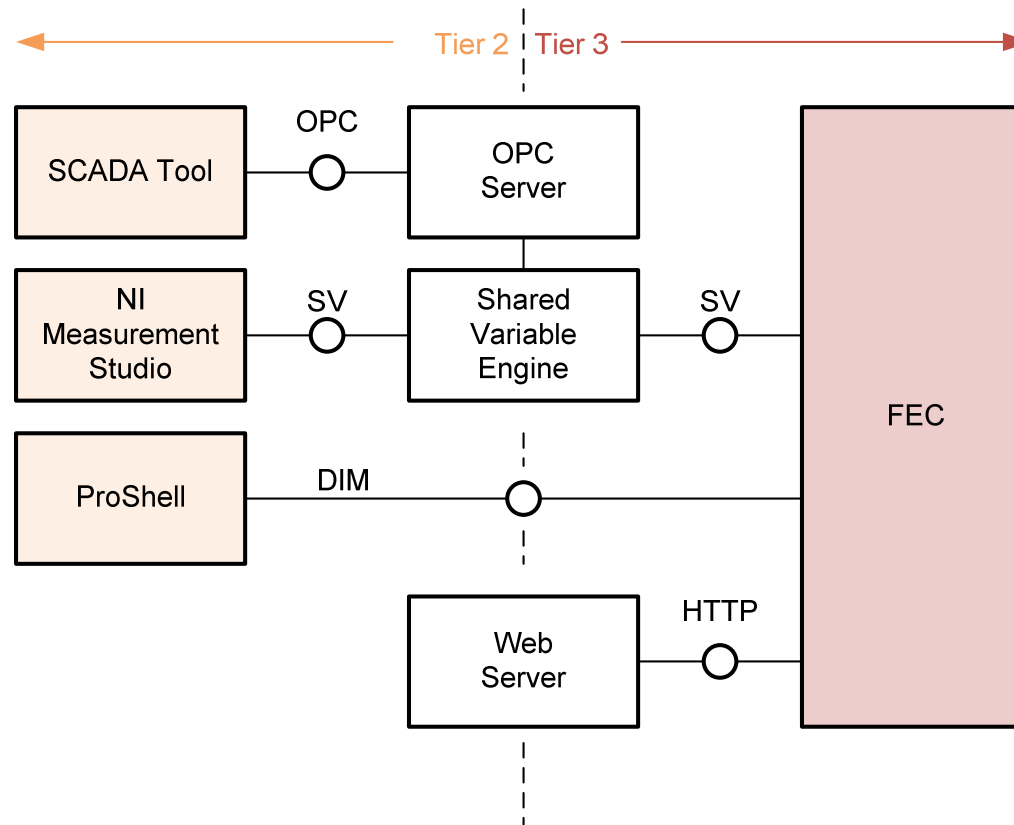

# WHERE is FECOS?

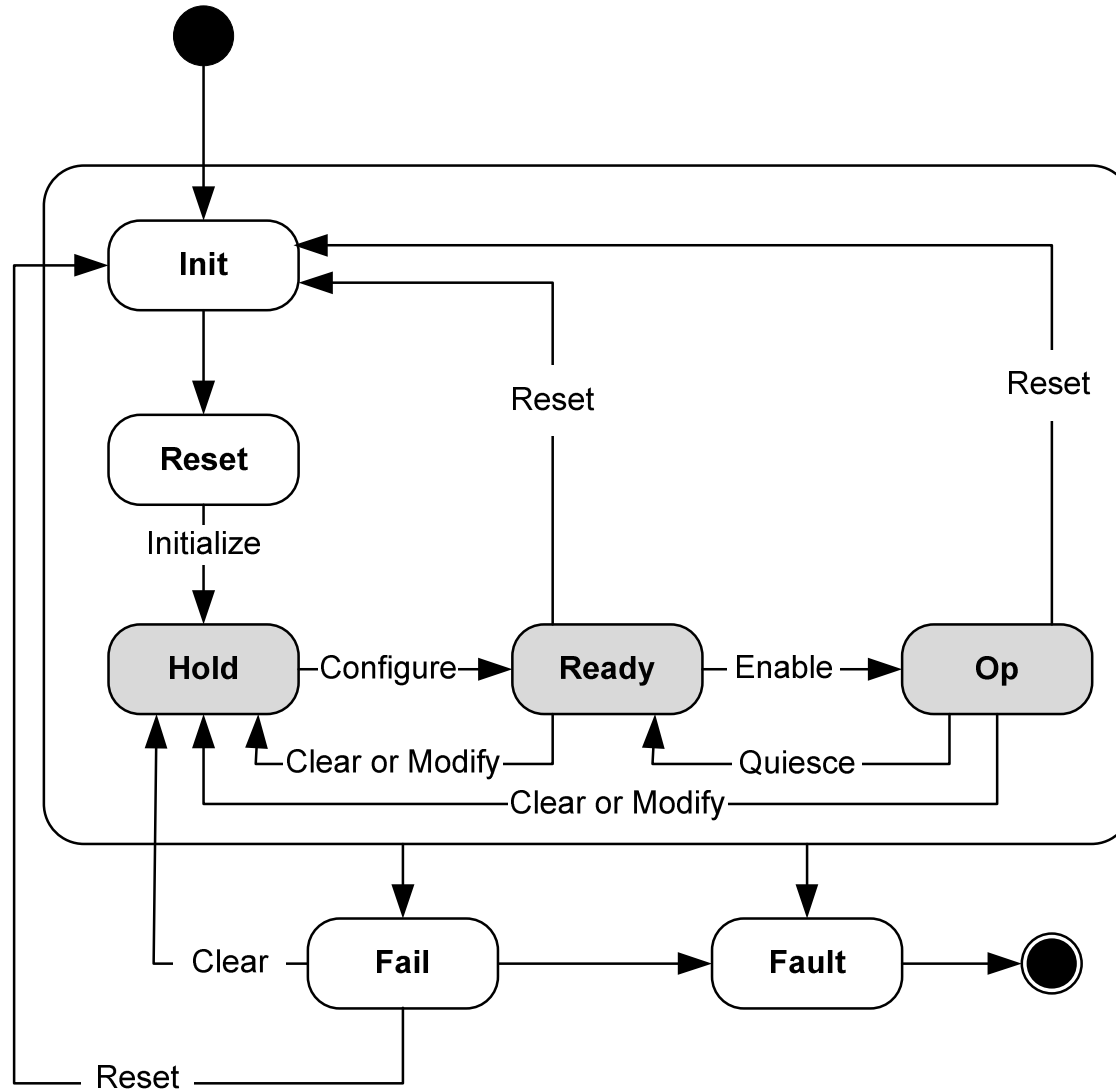

# WHY FECOS? (1/3)

- FECOS provides uniform communication:
  - communication protocol is completely hidden from the programmer
  - autonomously selected by the framework

# WHY FECOS? (2/3)

- FECOS provides uniform operation:
  - each component implements general state machine

# WHY FECOS? (3/3)

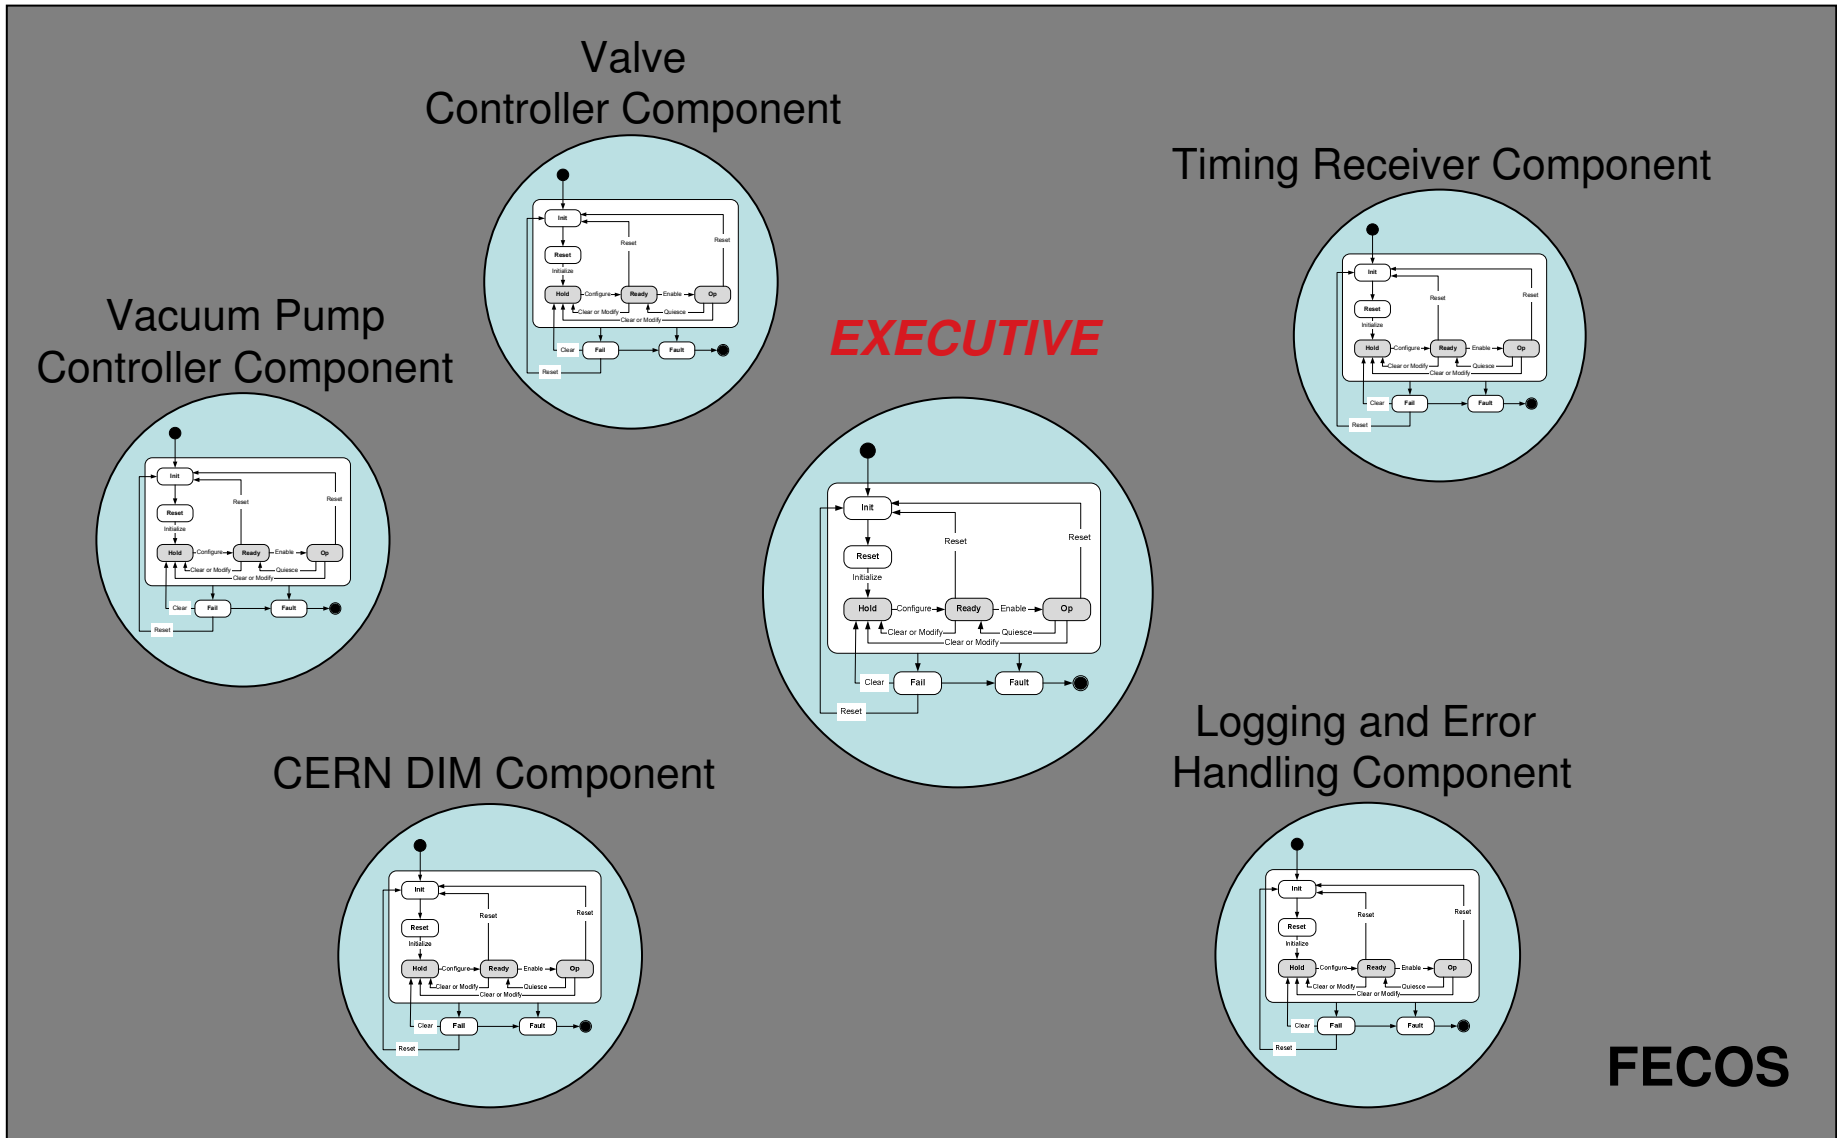

---

- FECOS provides standard “services” :
  - logging and error reporting
    - local to file and remote (via DIM)
  - timing system support
  - standard configuration services
    - local file, HTTP
  - watchdog and host health-status monitoring
  - ... etc. ...

**Programmer focuses on control logic**

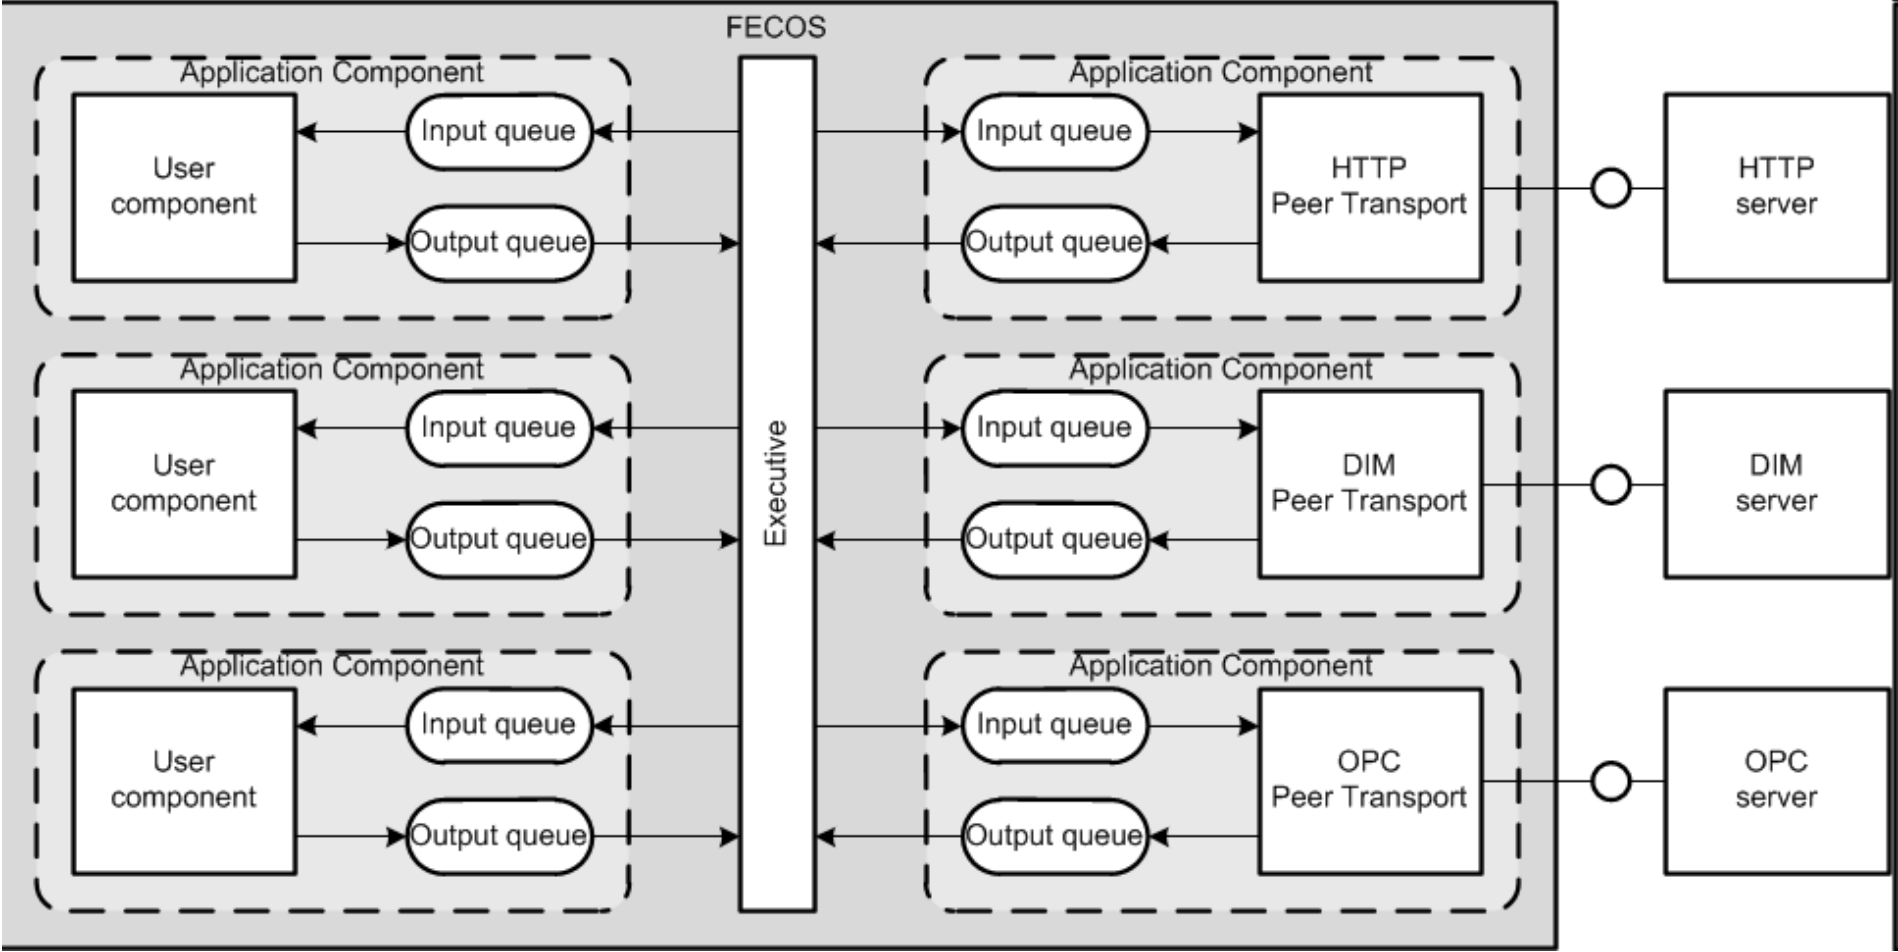

# Architecture (1/2)

- Modular, component based, event driven

# Architecture (2/2)

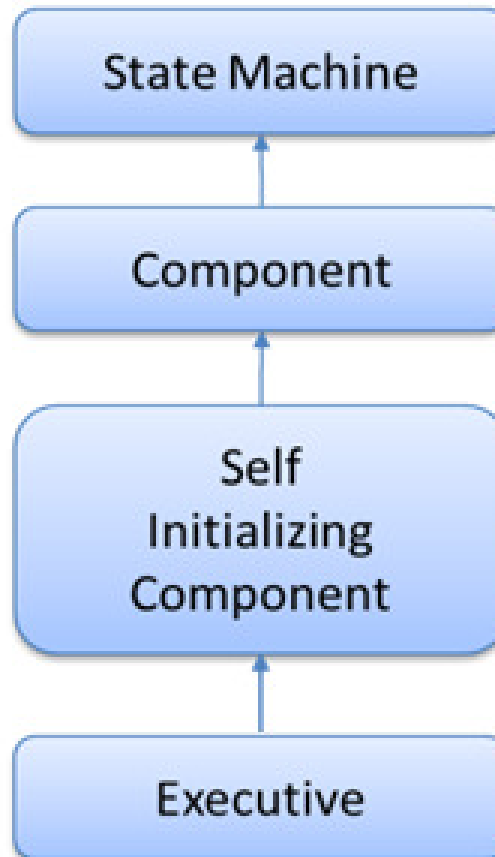

# OO design (LVOOP) (1/2)

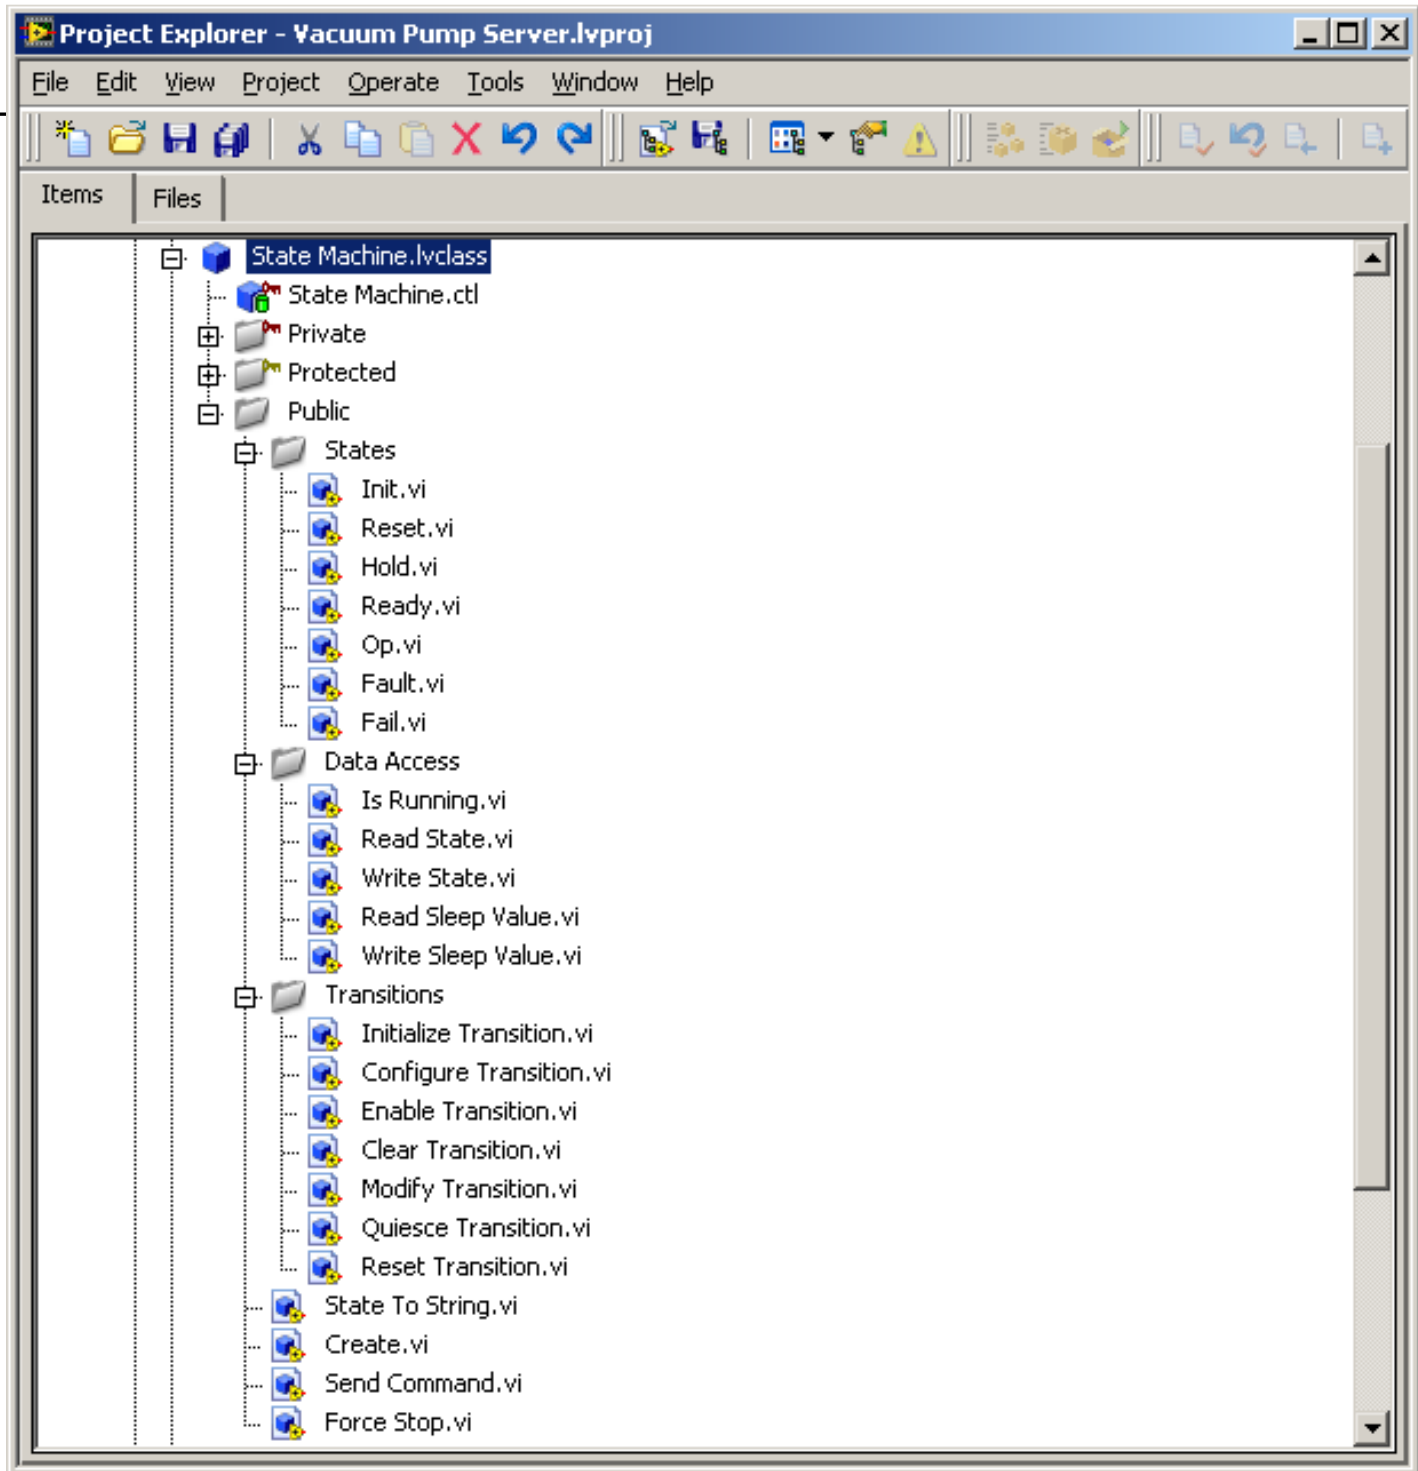

---

- Based on LVOOP
  - LV2009 needed to work on RT
  - Extensive use of “by reference”
    - We do not want to make “by value” copies of classes!

... see next slide ...

# OO design (LVOOP) (2/2)

# WHEN FECOS?

---

- Design finalized until September
- FECOS beta planned in October!

Thank you!
