Development Infrastructure and Setup

IT will be for you what you want it to be.

The way so far...

- CNAO Repository delivery

- bundling development software

- initial development environment

- general IT tasks

Ramp Up...

- Software / Licence management

- independent hardware for our development

- emerging virtualization infrastructure

- supporting the CCB/CCM activities

Long Time Perspective

- enhancing the SVN/Trac

- deployment methods for Windows OS

- Preparing the development HW/SW infrastructure

More to come…

Thanks you for your attention
