

# NUFACT 2020 WG1 Update

# Suggested Plenary Talks

- 5 Experiments
  - T2K
  - NOVA
  - DUNE
  - HK
  - JUNO
- All need to go to their respective speakers boards for speaker selection
- Expect all to have significant things to say
  - More Data
  - Funding Approval
  - Construction Progress
- Also suggest a talk on global fits
  - Thomas Schwetz(KIT) has been suggested by conveners, but many candidates available

# Parallel Sessions

- General requests for abstracts have gone to collaborations
  - Have the in for some as conveners are members of T2K and Nova speakers board.
- Currently preparing session plans
  - Three joint sessions
    - WG2, WG5 and WG6
  - Four WG1 only sessions
    - Long baseline
    - Reactor
    - Atmospheric
    - Fit + others
- Need to see full abstract list to complete these plans but will be ready to start sending requests in the next couple of weeks.
