

# International Workshop on Partial Wave Analyses and Advanced Tools for Hadron Spectroscopy (PWA 12 / ATHOS 7)

## Welcome to Bristol!

- Welcome to Bristol!
- 1947 Cecil Powell and Cesar Lattes discovered the pion here.
- 74 years on, it is still a vibrant physics department in a vibrant city, that we hope you will enjoy.
- For those who made it here: We are in the blue room. For private discussions and small meetings, we can also use the orange room.
- Online, we have two zoom rooms, one for the main meeting, and one for private discussions, breakout meetings.

# International Workshop on Partial Wave Analyses and Advanced Tools for Hadron Spectroscopy (PWA 12 / ATHOS 7)

## Welcome to Bristol!

- Talking to a face audience is nice, so if you can/feel comfortable we encourage those in zoom to leave the camera on (but mic always off please)
- to be gender inclusive we encourage rename your zoom name with your pronouns (she/her or his/him)
- Talks we set to have 20min + 10min for discussion, so please participate. Share with us your questions.
- discussion room in zoom (link!) and physical room for those in Bristol

# International Workshop on Partial Wave Analyses and Advanced Tools for Hadron Spectroscopy (PWA 12 / ATHOS 7)

## Welcome to Bristol!

- The chair will be local and zoom. So once the talk ends, raise your hand (physically or at zoom) to ask questions and comments and be patient
- Speakers: please upload your talk at indico page. Any problem just ask us for help.
- Do not worry about surrounding noises, we understand you might be at home (Kids, dogs, constructions, ...)
- Finally, but definitely not least lets make a nice and discuss ideas in a good scientific level free of harassment and discrimination

LOC: **Bristol** (Daniel, Paras, Jonas and Kostas); **Zoom** (Pat and Mark)
