

# HIOS: Heterogeneous I/O for Scale

Provide a scalable and efficient solution to the problem of streaming large quantities of data for the Exascale Analytics and Artificial Intelligence.

## Current status of progress:

% of deliverables completed so far: ~30-40%

% of budget (100 kEUR) spent so far: 53%

Any remaining uncertainties w.r.t planned deliverables

No

Yes

## Using students (PhD/MSc/BSc) in the project?

No

Yes

## Any interactions with other funded ATTRACT projects so far?

No

Yes; (project names...)

## If your project were to be selected for ATTRACT Phase 2:

**How would your technology scale up to become an industrial product/system?**

Integrability into existing HPC and Datacenter facilities is the key to scale up from the Proof of Concept!

**With who you would need to partner for this to happen? (No names, just profiles of type of organizations)**

Organizations delivering products in the same field...

**Have you already discussed this with KT Group?**

No

**What applications will you demonstrate with value for science, industry and society? (Examples)**

Any Data Science/Data Analytics application requiring ingesting a lot of data (100TBs+)

**Any comments, remarks or observations you would like to make to CERN?**
