

Topic #1 - Infrastructure

- High Level Plan
 - Month 1
 - identify areas of common interest / common direction
 - exchange background information for the areas of common interest
 - define the technical contacts on each of the teams to drill down on focus areas
 - understand current plans of the teams in these areas
 - Month 2
 - arrange virtual/physical workshop to share experiences
 - define upstream areas of collaboration and raise appropriate tickets
 - agree joint action plans
 - Month 3+ (onwards)
 - implement improvements as feasible in open source projects
 - share use cases with organisations such as the CNCF Research SIG or OpenStack SIG
- Particular Short Term Interest Areas
 - Openstack and Kubernetes, with OIDC support and Containers-as-a-Service
 - inventory, remote access, machine lifecycle handling with Big Data Platform and Cloud Accounting
 - Network design, Software defined networks on LAN and WAN
