

GoranFest: the joy of making physics

Wednesday, June 9, 2010 - Saturday, June 12, 2010

Split, Croatia

Scientific Program

The aim of the conference is to pay the right attention to the exciting situation of the field - with the advent of the LHC era - but considering it in a wider perspective, identifying the open problems and discussing the possible future developments.

Neutrino mass

Left-right symmetry

Grand Unification

Supersymmetry

Topological Defects and Early Universe

The origin of CP violation

Lepton Number and Lepton Flavor violation
