Poster Selection Committee

Volker Koch (US) (Chair)
Kari Eskola (FI)
Ludwik Turko (PL)
Bolek Wyslouch (US)
Helen Caines (US)
Xin-Nian Wang (US)
Maciej Rybczynski (PL)
Frithjof Karsch (DE)
Bedangadas Mohanty (IN)

Yasuyuki Akiba (JP)
Krzysztof Kutak (PL)
Marek Kowalski (PL)
Frederique Grassi (BR)
Gunther Roland (US)
Sangyong Jeon (CA)
Christina Markert (US)
Jacquelynn Noronha-Hostler (US)
John Harris (US)
Maria Paola Lombardo (IT)

10 posters selected out of about 500 accepted for presentation
Best poster winners

Kshitij Agarwal: Constraining Neutron-Star Matter with Microscopic and Macroscopic Collisions
Dana Avramescu: Heavy quarks in the evolving Glasma: diffusion, 2-particle correlations and comparison with Langevin dynamics
Wenqing Fan: Measurement of low-momentum direct photons in Au+Au collisions at 200 GeV
Matthew Heffernan: Bayesian quantification of the Quark-Gluon Plasma from a hybrid model with an IP-Glasma initial state
Nicole Lewis: Identified hadron spectra and baryon stopping in γ+Au collisions at STAR
Dukhishyam Mallick: Search for higher mass resonances via KK decay channel in pp collisions with ALICE at the LHC
Debora Mroczek: Using active learning to constrain the size and location of the QCD critical point
Monika Robotková: Multi-dimensional measurements of the parton shower in pp collisions at RHIC
Azumi Sakai: Space-time evolution of critical fluctuations in an expanding system
Stefan Stojku: Anisotropy of the QGP droplet explored through high-p⊥ data
