[A06] CMS Pixel: New Layer 1 and other Upgrades to the current Tracker during LS2

Monday 5 October 2020 22:55 (30 minutes)

The CMS Phase-1 Pixel Detector was successfully operated in 2017 and 2018 of the LHC Run 2. To be ready for Run 3 many updates and improvements are done or will be done in the second long shutdown of the LHC.

Presenter: PADEKEN, Klaas (Vanderbilt University (US))

Session Classification: Current Detector II
