

**Session Program**

5-8 Oct 2020

**The 29th International Workshop on Vertex  
Detectors**

***Monolithic I***

# Wednesday 7 October

20:00

## Monolithic I

**Session** | **Location:** Vertex2020 will be held virtually | **Conveners:** Daniela Bortoletto, Toshinobu Miyoshi

20:00–20:30

### [C01] R&D status of monolithic SOI pixel sensor for vertex detector

**Speaker**

Miho Yamada

20:30–21:00

### [C02] Latest depleted CMOS sensor developments in the CERN RD50 collaboration

**Speakers**

Ricardo Marco Hernandez, Dr Ricardo Marco Hernandez

21:00–21:30

### [C03] Latest developments and results of radiation tolerance CMOS sensors with small collection electrodes

**Speaker**

Ignacio Asensi Tortajada

21:30–22:00

### [C04] Depleted Monolithic Active Pixel Sensors in LFoundry 150 nm and TowerJazz 180 nm CMOS technologies: The Monopix developments

**Speaker**

Marlon B. Barbero

22:00
