

ROTATION: SIZE MAP

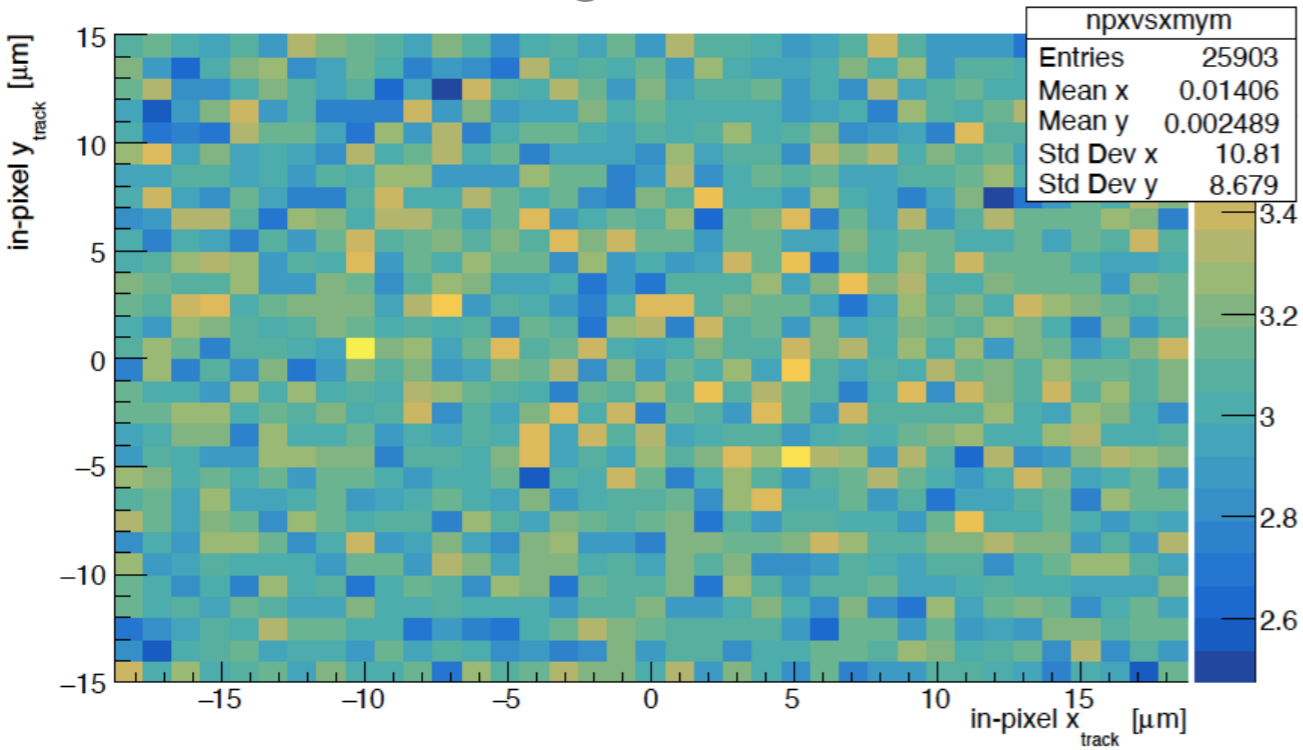

5 deg

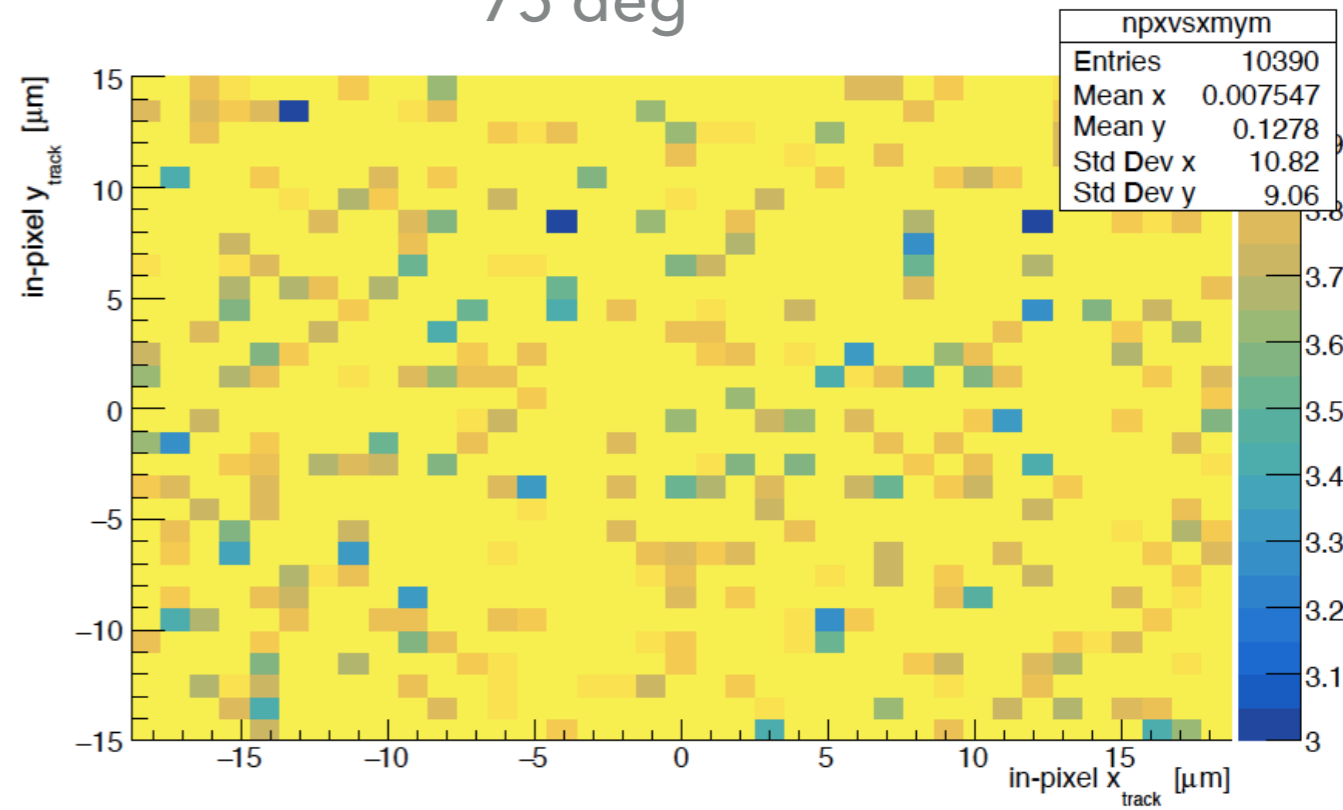

20 deg

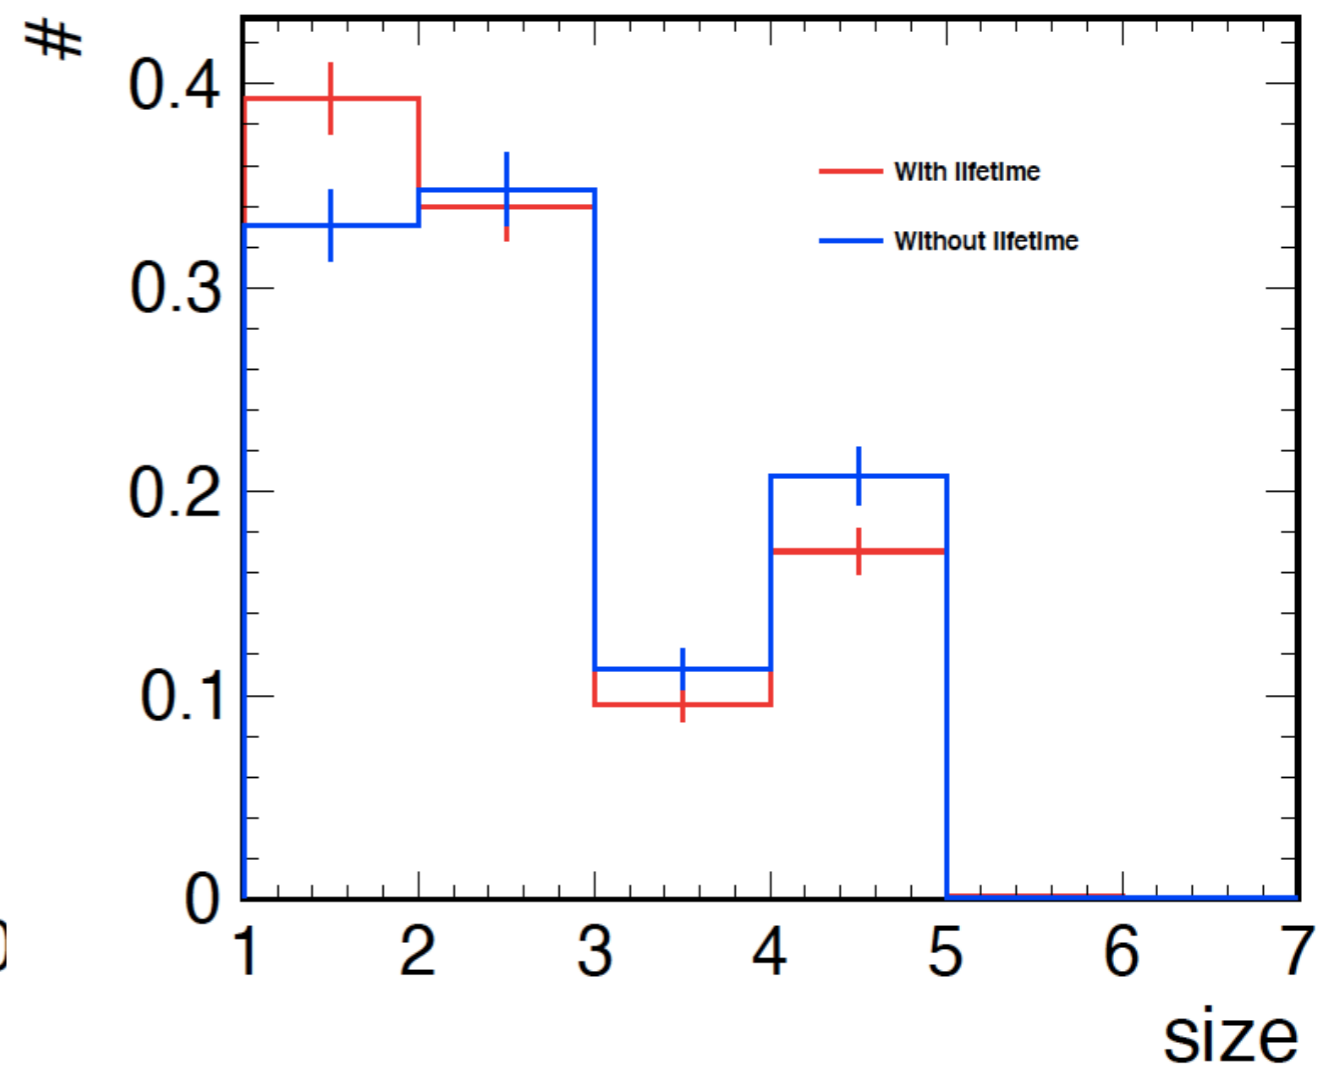

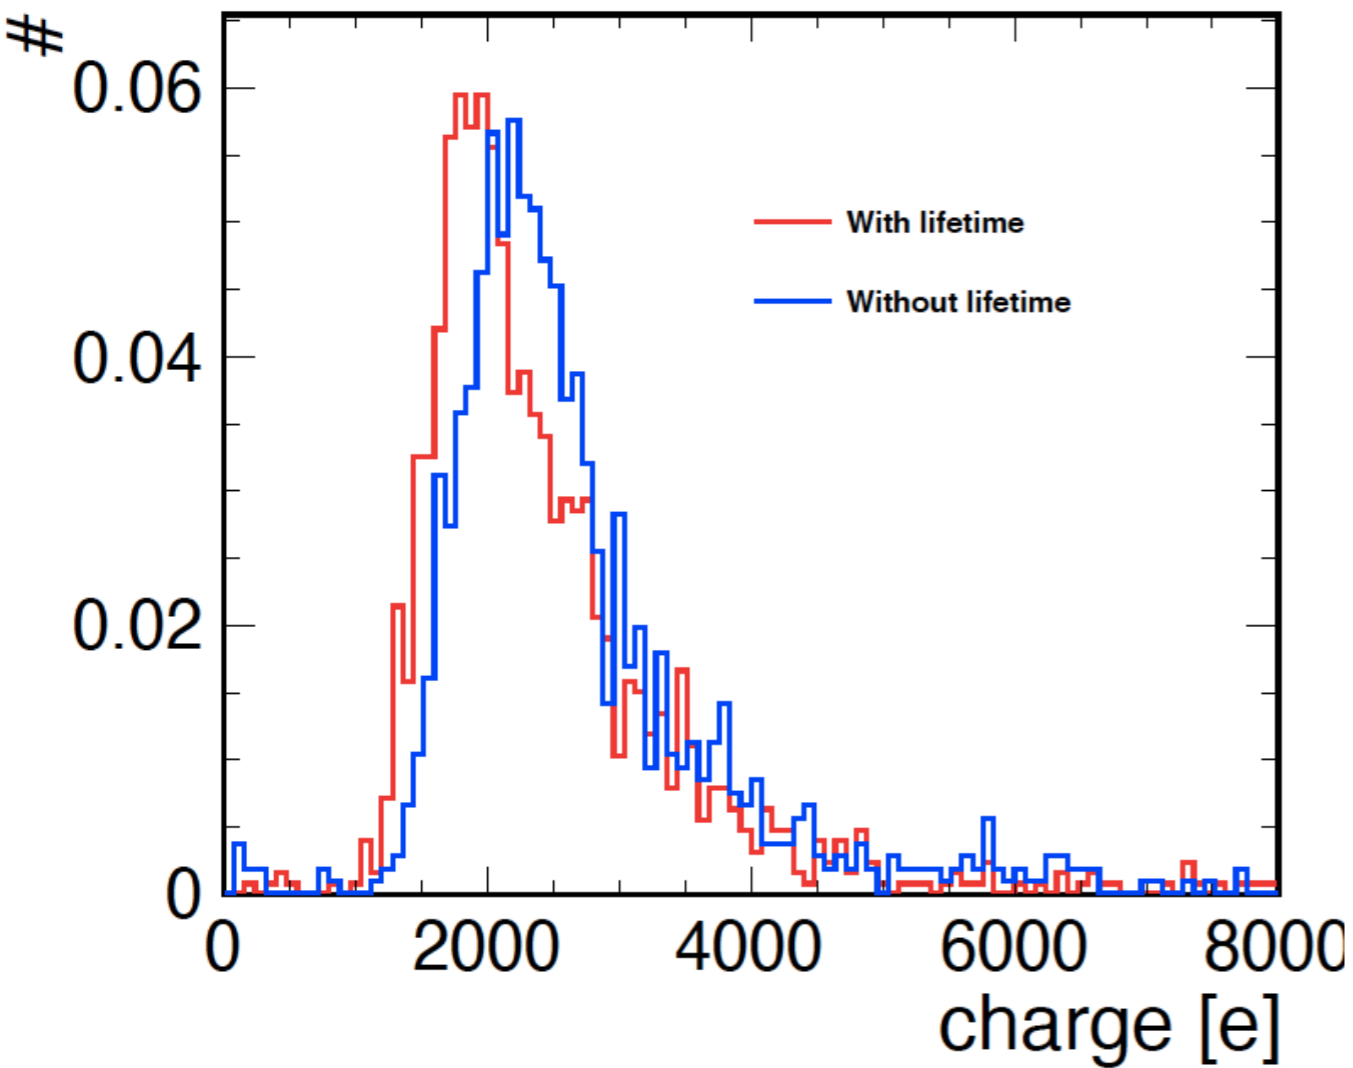

60 deg

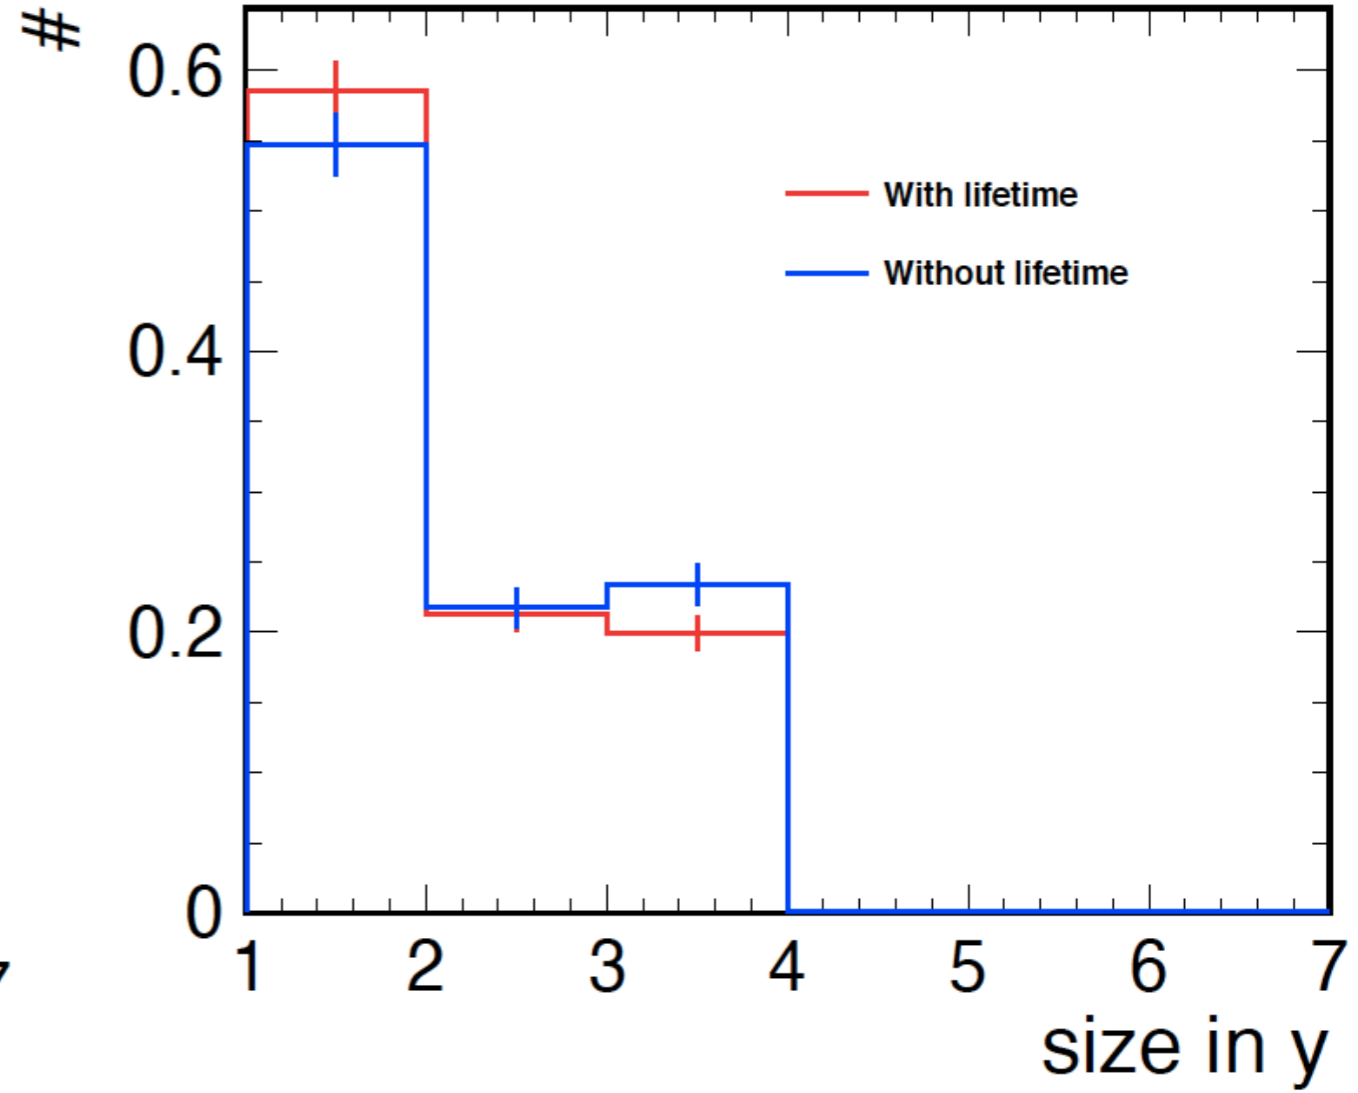

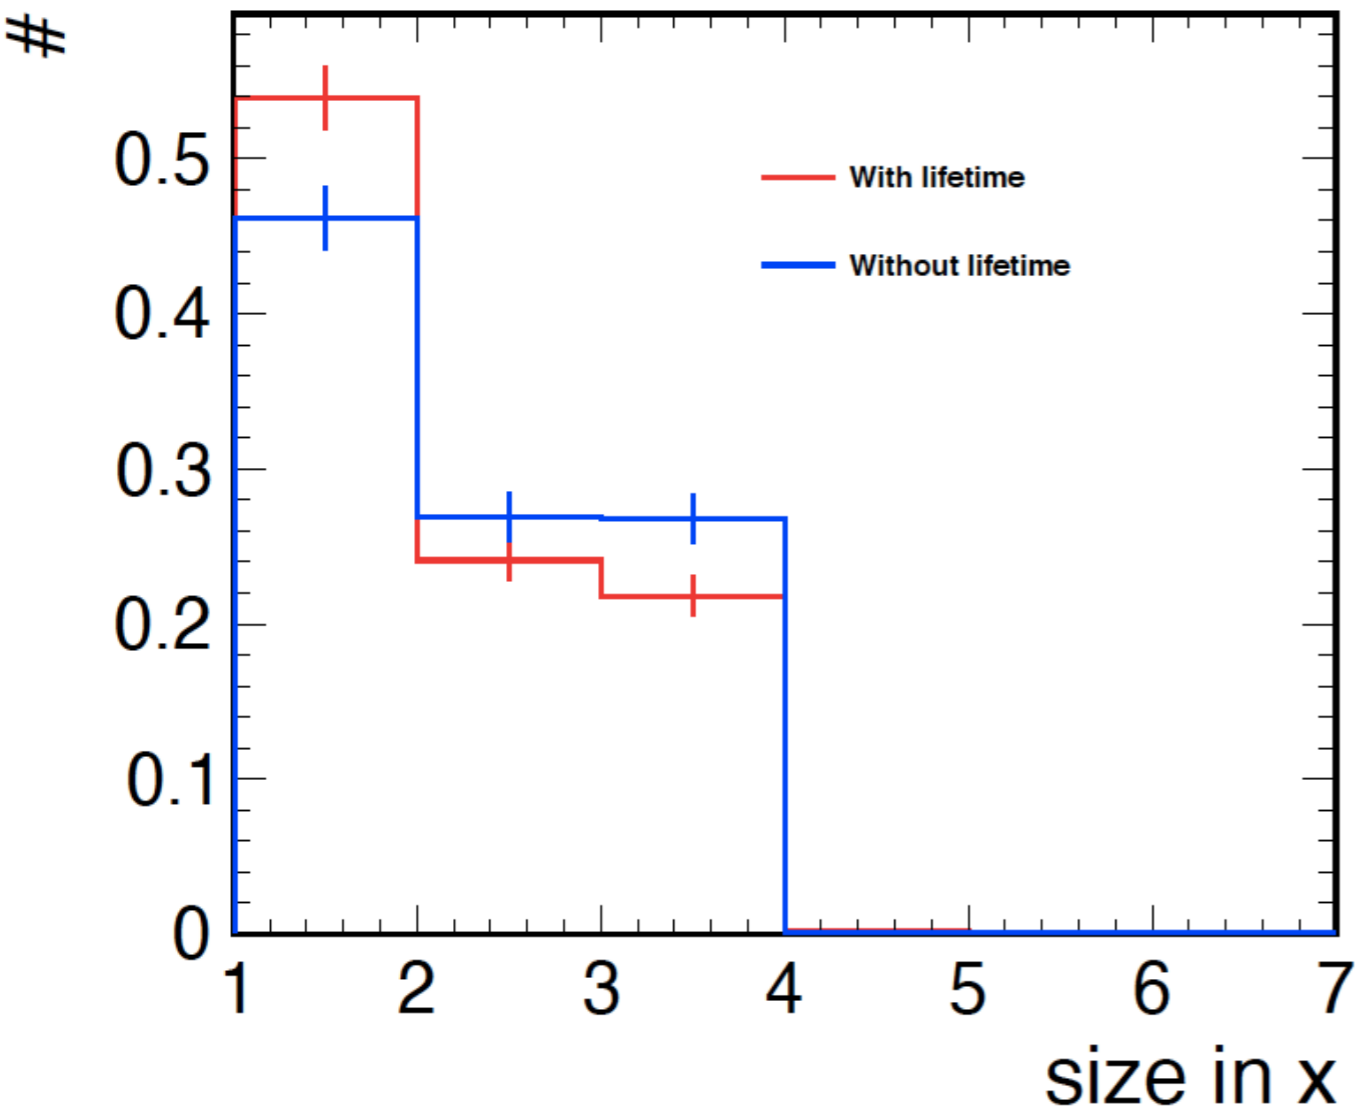

75 deg

Efficiency > 99.8%

- Most probable value (with lifetime) $\sim 1900e$
- $30 \text{ um} * 63e/\text{um} = 1890e$ (similar to what was seen in test-beam)

- In test-beam data: mostly 1 and 2 pixel cluster in x/y direction
