Possible themes

- Data access on the Grid
  - File catalogues
  - Security issues (ACL, encryption, confidentiality)
  - Storage support (SRM…)
  - Massive data transfer protocols and strategies
  - Data base access (data base replication and federation)
- Workload and workflow
  - Workflow mechanisms
  - Workload ("production system", DRMAA…)
- Grid monitor
  - LCG working group and beyond
- Interactive usage of the Grid
  - SDJ
  - DIANE
- Site management and VO management
  - OGF/VOMG (Involve Rolf and Frèdèric)
  - Experience from small sites
  - Experience from an infrastructure point of view (SA1)

Proposal for the abstract template for the User Forum II

Abstract template
This abstract is made up of three parts. Please fill all three fields according to the suggestions.
Describe the scientific/technical community and the scientific/technical activity using (planning to use) the EGEE infrastructure. *A high-level description is needed, neither a detailed specialist report nor a list of references.* (300 char max)
Describe the added value of the Grid for the scientific/technical activity you (plan to) do on the Grid. (400 char max)
Report on the experience (or the proposed activity). It would be very important to mention key services you have used, including limitations (both in terms of existing services or missing functionality). (500 char max)
