CBI

Challenge based innovation courses

What it is

- Running courses with students from partnering universities

- The students will come to IdeaSquare typically for 1, 2, or even 3 weeks during the course, following design thinking methodology or similar

- Using CERN technologies as inspiration

Why are we doing it

SUPPORTING THE FUZZY FRONT-END OF INNOVATION THROUGH INSPIRING BRIGHT YOUNG STUDENTS TO BECOME TRAILBREAKERS

TO PROVIDE A TESTBED FOR NEW METHODOLOGIES IN EXPLORING THE CREATION OF BREAK-THROUGH INNOVATION

TO PROVIDE A GLIMPSE TO PEOPLE ON WHAT CERN IS ABOUT

Why should we keep on doing it

- Students can work on ATTRACT technologies
- Methods to be used in ATTRACT can be tested in CBI
- Methods to be used in CROWD4SDG can be tested in CBI
- There will be a teachers meeting in Nov-Dec, in which the further potential of CBI and CBI-like student courses will be discussed
