## Recent dark sector results from Belle II

*Thursday 21 July 2022 16:30 (20 minutes)*

Belle has unique reach for a broad class of models that postulate the existence of dark matter particles with MeV—GeV masses. This talk presents recent world-leading physics results from Belle II searches for dark Higgstrahlung and invisible  $Z'$  decays; as well as the near-term prospects for other dark-sector searches.
