EPJ Plus Focus Point: Past and Present: Recent Advances in the Investigation of Ancient Materials by Means of Scientific Instrumental Techniques

Published on 12 December 2019

This Focus Point introduces selected papers from the contributions presented at the 10th Congress of Italian Association of Archaeometry (AIAr) held in Turin (Italy) in February 2018, where a large *parterre* of Italian as well as International researchers shared their experiences on new and more consolidated analytical approaches on archaeological and artistic materials.

Different topics were addressed in the realm of cultural heritage, from *characterisation and diagnostics* to *bioarchaeology and man-environment interaction*. A strong focus was put on the comparison between non-invasive/non-destructive and micro-invasive methods in the study of different categories of objects, evaluating the pros and cons of each approach.
