

Plans for a Single Kerberos Service at CERN

Wednesday 3 November 2010 09:00 (30 minutes)

CERN IT is planning to merge CERN's two Kerberos services. The aim of this presentation is to provide an overview of:

The problems of having two Kerberos services and why this merger is being carried out

The planned 'post-merge' Kerberos infrastructure

The method which will be used to merge the two Kerberos realms and the infrastructure changes made

The project timeline and user involvement
