

DUNE signoff

Raja Nandakumar

Introduction

- Computing effort not yet mature
 - Computing model not yet finalised
 - Metrics and plots not yet readily available
 - Still understanding / rationalising different sources
 - Running off shared instances
 - Job submission and monitoring
 - FIFE, UCSD glide-submission, ...
- Computing consortium working on improving the situation
- Running much fewer jobs than expected
 - Known issue
- RAL overall running quite well for DUNE
 - Many thanks!

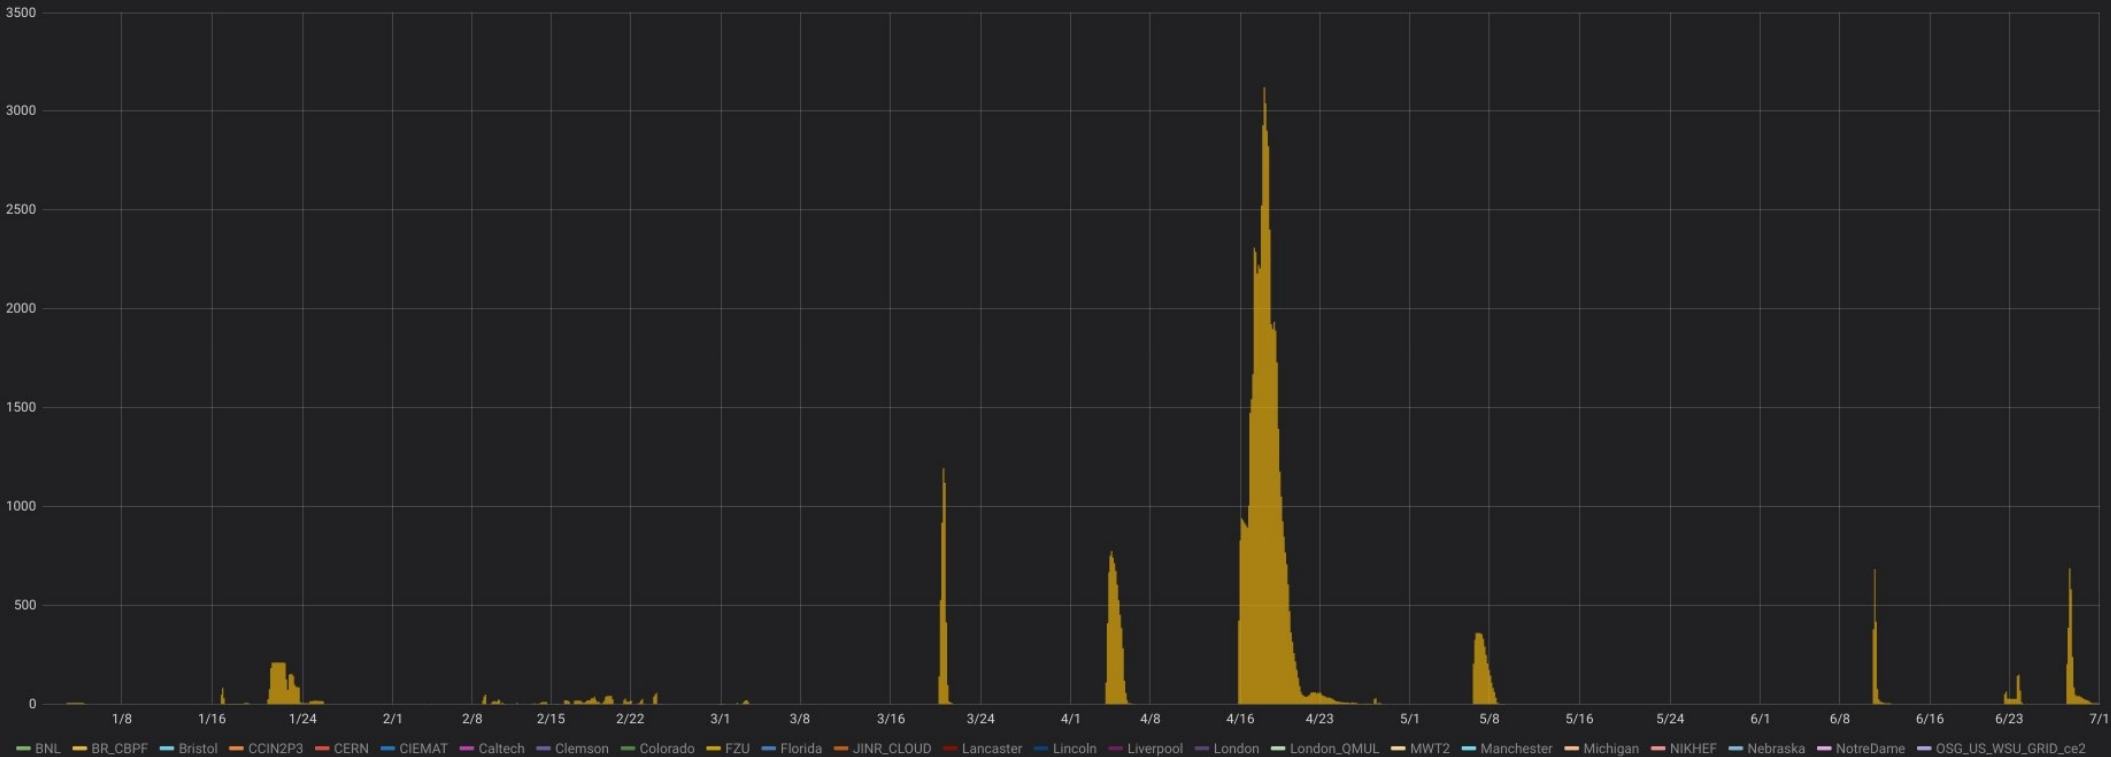

DUNE jobs summary

- Most jobs are multi-core
 - 8-core jobs at RAL
 - Lots of TensorFlow usage
- Software not yet mature enough to run all needed simulations
 - Still too bloated to run on the grid
- Too little computing manpower
 - Spread too thin to worry about smaller details
- glide-in WMS not yet properly tuned for RAL
 - Ticket opened
