

	<p>LHC Computing Grid Project</p> <p>Status of Resources and Financial Plan</p> <p>Computing Resources Review Board (C-RRB) – October 2010</p>
---	---

1. Introduction

The following report summarises

- Current signature status of the Worldwide LHC Computing Grid (WLCG) Memorandum of Understanding (MoU) and Tier definition
- Funding and expenditure status for WLCG at CERN
- Resource accounting for Tier-0,1 and 2 sites
- Resource pledges for 2011 and 2012

Complementary information can be found on the WLCG website <http://lcg.web.cern.ch/LCG/>

2. WLCG Memorandum of Understanding Signature Status

Since the October 2009 C-RRB meeting, no further signatures have been obtained however some countries have expressed an interest to join WLCG and are currently working on funding scenarios and administrative details. The current signature status including date of signature as presented at the last meeting therefore remains unchanged.

In several cases the MoU documents were signed some time ago in the early years of the project. In the current continuous data-taking mode, certain countries are reviewing the definition of their Federations or adding new sites. A new French Tier-2 site, CPPM in Marseille has very recently joined. Any such change must be reflected in the MoU annex 1 or 2 as should changes to the collaboration representatives following retirement or restructuring or changes to Funding Agency organisation or their acronyms.

Table 1 shows the current definition of the Tier-1 sites, and Table 2 the Tier-2 sites as reflected in the MoU annex 1 & 2. Any currently incorrect information or future changes should be signalled to lcg.office@cern.ch to ensure that the MoU information available at <http://lcg.web.cern.ch/LCG/mou.htm> is constantly maintained up to date and accurate.

Table 2: Tier-2 sites as defined in Annex 2 of the WLCG MoU

3. Funding and Expenditure for WLCG at CERN

Exceptionally, and with the agreement of the C-RRB Chair, the usual funding and expenditure table will not be presented at the meeting. Discussions are still ongoing to finalise cost planning with respect to the recent CERN material budget cuts, the accelerator run schedule, requirements from the experiments, the upgrade of the existing CERN Computer Centre, latest technology changes and the future Computer Centre strategy for which the deadline for expression of interest was extended.

For personnel costs, nominative details continue to be entered in CERN's planning tool APT including current personnel commitments, planned replacements and the impact of EU projects EGI and EMI on CERNs personnel budget.

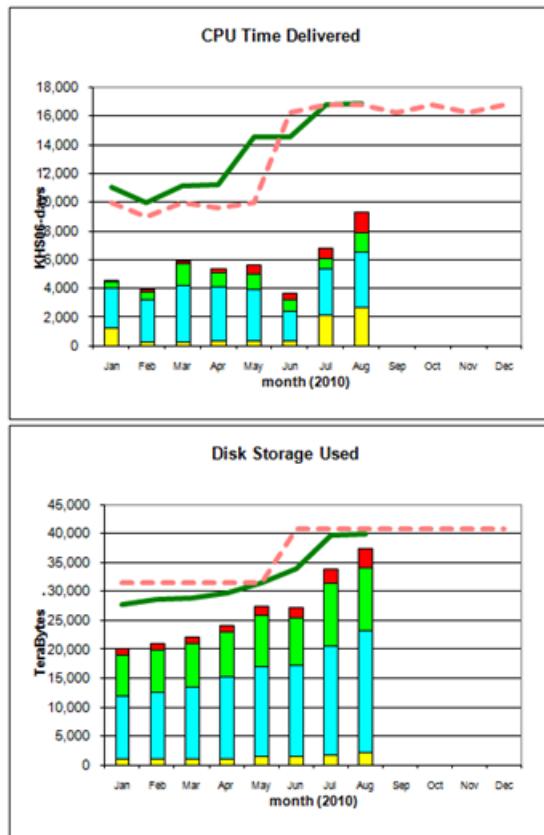

More details including the tables normally presented will be included in the next report.

4. Resource Accounting

4.1 CERN and External Tier-1 Accounting

Accounting data for CERN and External Tier-1 sites has continued to be reported to the C-RRB meetings, and full accounting reports from 2006 are available on the LCG website Accounting page <http://lcg.web.cern.ch/LCG/accounts.htm>.

Figure 1 shows the CPU delivered, Disk and Tape used at CERN and the external Tier-1s for the period January to August 2010 inclusive.

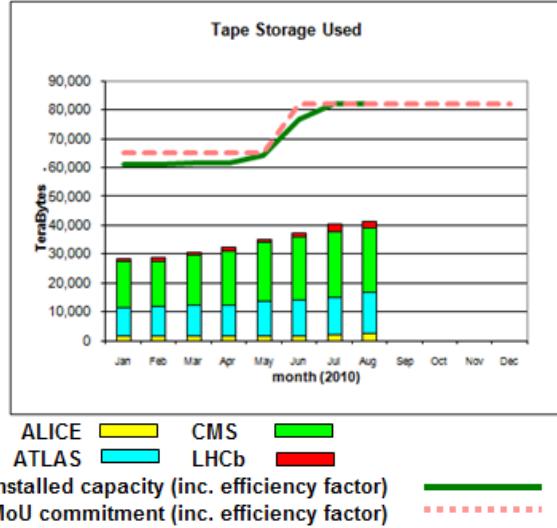

Figure 1: Accounting for CERN and External Tier-1s January - August 2010

The monthly reports including detailed information and graphs per site are distributed to the Overview Board Members and are available from the accounting page on the WLCG web as referenced above. To be noted exceptionally in 2010, deployment of resources was accepted up to June 2010. The usual resource deployment by April schedule will be resumed for 2011.

4.2 Tier-2 Accounting

Tier-2 accounting began in September 2007 and as for Tier-1 accounting, past reports can be found on the above referenced LCG website Accounting page.

Figure 2 shows the Federations with MoU pledge values above 7000 HS06 and Figure 3 all those with pledge values below 7000 HS06, in both cases ordered by pledge and showing CPU used by site in July and August 2010.

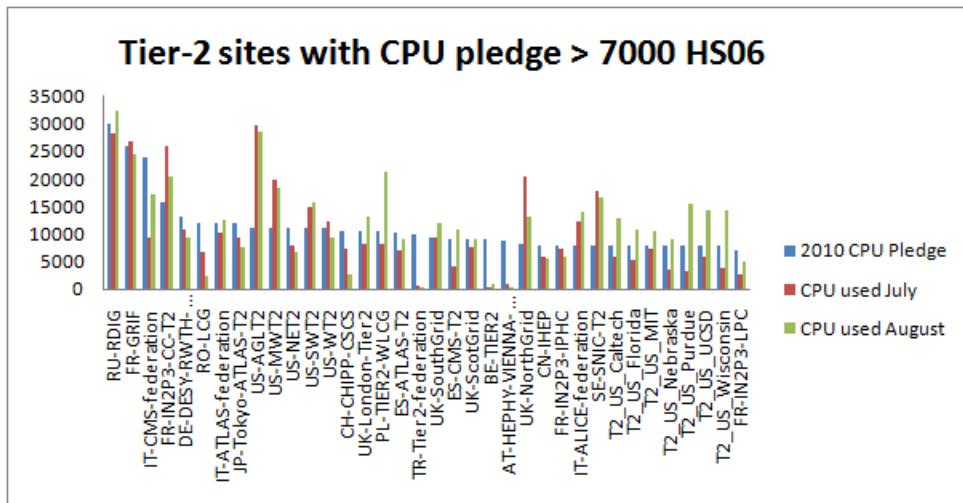

Figure 2: Accounting for Federations with CPU pledge > 7000 HS06 in July & August 2010

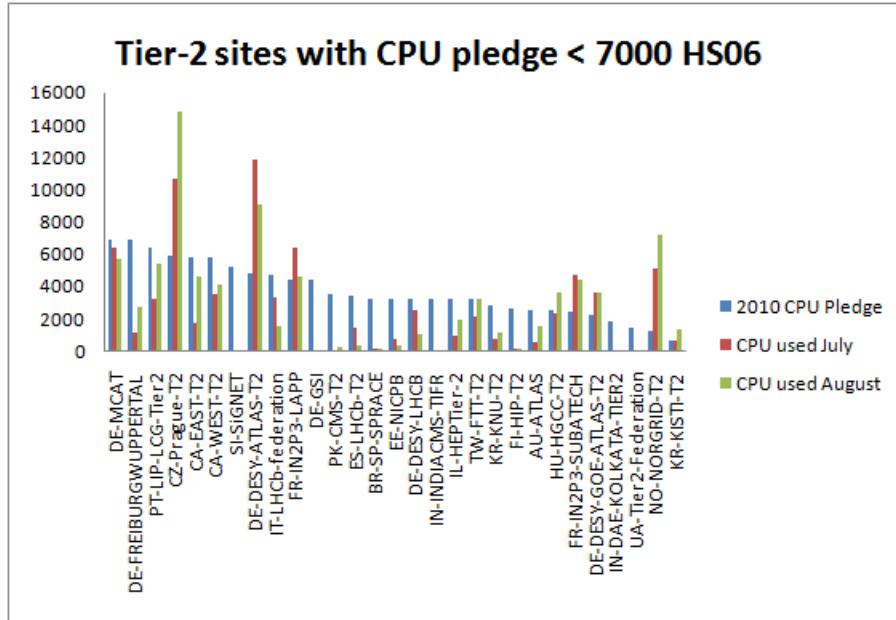

Figure 3: Accounting for Federations with CPU pledge < 7000 HS06 in July & August 2010

These figures show that many of the T2 sites are showing very encouraging results, however not all. Follow-up is on-going notably with Germany-GSI, India-TIFR and VECC, and Ukraine to understand their reporting problems and ensure they are included in the accounting reporting as soon as possible.

5. Resource Pledges for 2011 and 2012

At the last C-RRB meeting delegates were requested to ensure that pledge input for 2011 and 2012 was provided by 30th September 2010 at the latest for approval at the Autumn C-RRB meeting. The request was repeated by email on 4th May 2010 including the agreed experiment requirements for 2011 and preliminary requirements for 2012 as a basis for input following the scrutiny process.

As specified in the MoU, the Autumn session of the C-RRB should approve the Resource Pledge tables of particular importance for the following year. Up to the LHC start-up and the start of physics data some flexibility could be tolerated, however this is no longer the case and the deadline for input needs to be respected in order to present resource tables, used for planning purposes, which are as complete and accurate as possible.

It was encouraging to note by the 30th September deadline all but one Tier-1 and all but two Tier-2 sites had submitted input. The missing information was provided on 1st and 2nd October respectively therefore the tables presented to this Autumn session of the C-RRB are in a reasonably final state waiting for funding grants or proposals to be formally accepted in certain indicated countries.

Table 3 shows the summary result for the Tier-1 sites and Table 4 for the Tier-2 sites of the confirmed resource pledges in 2011 with detail by experiment according to their requirements, and the planned 2012 pledges.

Summary Ext. Tier1s	2010	2011	2012	Split 2011	ALICE	ATLAS	CMS	LHCb	SUM 2011
CPU (HEP-SPEC06)	402416	524284	540807	Offered	71471	250208	132173	70432	524284

				Required	13000	30100	52400	3470	98970
				Balance	-38%	6%	-15%	13%	-11%

Table 3: 2011 and 2012 requirements and resources pledged for Tier-1 sites status (04/10/10)

Summary Tier2s with Split in 2011	2010	2011	2012	Split 2011	ALICE	ATLAS	CMS	LHCb	Sum 2011
CPU (HEP-SPEC06)	502367	1356127	1406353	Offered	81574	281228	315363	47962	726127
				Required	121000	278000	319500	36000	754500
				Balance	-33%	1%	-1%	33%	-4%
Disk (Tbytes)	39255	98568	114312	Offered	5878	34203	20393	295	60768
				Required	6600	37600	19900	20	64120
				Balance	-11%	-9%	2%	1377%	-5%

Table 4: 2011 and 2012 requirements and resources pledged for Tier-2 sites (status 04/10/10)

Annex 1 of this report contains full details per site including notes with comments for certain sites and colour coding where the pledge information is waiting for final confirmation or where the pledge has decreased with respect to the 2010 confirmed pledge.

Attention is drawn to the 5 Tier-2 sites whose CPU and/or Disk pledge for 2011 is lower, or sometimes significantly lower than the 2010 confirmed pledge. This could imply that the 2010 confirmed pledges were not deployed although there could be other reasons. The agreed deployment delay in 2010 from April to June was perhaps a contributing factor in that it may not have been foreseeable at the time of the last meeting that these resources would not be deployed by June.

All pledge information is also now available via the gstat tool which will be the future tool used for all pledge data. Table 5 shows a screen-shot of the summary tab on 4th October indicating the result for 2011 for pledge data.

Year: 2011

Table 5: gstat screen-shot showing the pledge summary data for 2011 (status 04/10/10)

Globally in 2011 according to the experiment requirements indicated, there is resource shortfall at the Tier-1's particularly for the ALICE and CMS experiments and at the Tier-2's particularly for ALICE and ATLAS for disk.

6. Conclusion

No new MoU signatures have been added since the last report to the C-RRB however some countries have expressed interest in becoming future collaborators. A new French Tier-2 site, CPPM in Marseille has recently joined WLCG. Delegates are reminded to check their Tier definition and associated information as defined in the MoU annex 1&2 and signal corrections and changes as they occur.

The LCG Personnel budget continues to be closely monitored. Internal discussions are still ongoing to terminate the strategy and cost planning of the LCG materials budget following the CERN budget cuts. More details will be given at the next C-RRB meeting.

Tier-1 and Tier-2 accounting will continue to be monitored on a monthly basis particularly follow-up with the Tier-2 sites still not reporting.

Following communication of the experiment requirements for 2011 and 2012 pledge input was received leading to the publication of the pledge tables in annex 1. The result shows resource shortfall at the Tier-1 and Tier-2 sites in 2011 in particular for ALICE.

2011 pledged resources must be deployed by April 2011 at the latest. Any 2011 pledges not fully deployed must be signalled and explained at the April 2011 C-RRB meeting.

TIER 1 Notes

Note 1: Netherlands These pledges are unconfirmed due to incomplete negotiations with the Funding Agency. The current assumption is that they will be accepted before end 2010 enabling procurement to commence however the compute and disk resource deployment will be delayed, available by summer 2011.

Note 2: UK Tape is provisioned on demand. The full pledge will not be deployed until required.

See also the online WLCG Resources Pledges database at: <http://gstat-wlcg.cern.ch/apps/pledges/>

TIER 2 Notes

Note 1: Australia:numbers are currently constrained by data centre power and cooling limitations. New DC is due for completion early mid-2011. Numbers may be increased.

Note 2: Belgium the FNRS pledges for 2011 are subject to approval of the funding request for 2011 by the FNRS funding agency

Note 3: Canada : These pledges are unconfirmed due to the timing of the Call for Proposals process in Canada. The current assumption is that the proposal will be accepted and all new resources will be available by 1 April 2011.

Note 4: Russia - possibility that resources will increase.

Note 5: The Swedish Research Council will take a decision concerning 2011 Tier2 pledges on 4th November 2010.

Note 6: Ukraine: Awaiting confirmation of CPU in HS06 (core numbers already provided). Figures are given in a reserved manner due to recent budget crisis and as such may be reconsidered.

Colour codes

 Preliminary information delivered, awaiting final confirmation

 Pledge decreased from 2010 pledge
