## Alarms in relation with Post Mortem

*Tuesday 16 January 2007 11:30 (15 minutes)*

LASER will provide alarm event information to the PM system in the case of a PM event. A first solution, agreed between the LASER and the PM teams at the end of 2005, will be described. Since then, the LASER system has evolved which opens up other possibilities to integration. These solutions will be discussed as well as the questions they give rise to.

**Presenter:** SIGERUD, Katarina (CERN)

**Session Classification:** Session 1
