

Welcome and Introduction

Helge Meinhard / CERN
HTC Condor Workshop 2020 in Zoom Land
21 September 2020

Welcome

- To all registered participants (214 as of this morning!)
- Pleased to see so much support for holding the workshop despite sanitary restrictions, and hence for holding it online

Thanks in Advance

- To you – without registrants and attendees, the workshop would be pointless
- To all speakers from the HTCondor team and the user community alike
- To my colleagues in the organising committee for their collaboration, including serving as session chairs etc.
- To all technical support people making this virtual workshop possible

Logistics (1)

- Zoom passcode and link to shared document
 - See my mail this morning. Don't forward, but tell people interested to register
- Programme very dense and full
 - Rich and very interesting workshop
 - Strict time keeping will be required (and enforced!)

Logistics (2)

- Limited possibilities for questions, comments, discussion
 - Use the hallway and the office hours!
 - Like to speak up after a presentation? Use Zoom “raise hand” feature
 - Feel free to enter questions and comments into the shared document
 - ... but don't forget to “raise hand”
 - Will try and address points offline for which there was no time during the session (but no promises)

Logistics (3)

- No reception, social dinner, coffee provided
- No group photo
- Everyone's help is requested to ensure that this virtual workshop will run smoothly and be productive
