

# Where do we go from here? - The next phase of computing in HEP

*Monday, 5 September 2011 10:00 (40 minutes)*

The speaker will start by reviewing the dominant technologies chosen for the LHC Computing Grid and briefly discuss their suitability. He will then go on to look at technologies that have emerged since, but are not being seriously used. Some of these technologies are being or have been evaluated by the CERN openlab. In the last part of the talk the speaker will argue for the adoption of certain of these technologies for the direct benefit of the LCG/HEP community.

**Primary author:** JARP, Sverre (CERN)

**Presenter:** JARP, Sverre (CERN)

**Session Classification:** Monday 05th - Morning session

**Track Classification:** Track 1: Computing Technology for Physics Research
