

Hi OpInt community,

1. The paper [“Real-Time Anomaly Detection in Data Centers using an Evolving Fuzzy Approach”](#)
2. And the paper [“Comparison of Evolving Granular Classifiers applied to Anomaly Detection for Predictive Maintenance in Computing Centers”](#) both published at IEEE WCCI 2020 iare available at researchgate and they were presented in the OpInt Meeting.
3. The paper [“EGFC: Evolving Gaussian Fuzzy Classifier from Never-Ending Semi-Supervised Data Streams -- With Application to Power Quality Disturbance Detection and Classification”](#) is about the method used in (1).

The presentation (1) is available on [youtube](#).

Another related presentation (the description of EGFC algorithm) is also available on [youtube](#).

Cheers,

Leticia Decker
