Talks and Timing

- We are uploading the talks to [Indico](#) and also to [YouTube](#)
  - You can subscribe to the [HSF YouTube Channel](#)
- This session was formed from all of the abstracts that we received in the open call
  - Many thanks to *everyone* who submitted abstracts
    - We just did not have time to accept all the talks
  - If we did not have time for your talk today, please think about contacting a relevant HSF Working Group to present your work
- Even the smaller selection of talks that we have today only allows quite short talk slots
  - So our *thanks in advance* to our speakers *for keeping to time* and preserving the discussion slots
  - We will gently remind you when your time is running short
- Don't forget the [workshop notebook](#) for questions and discussion (as well as ✋)
