

MC-PAD Midterm Review

Marco Villa

ESR @ CERN

28th September 2010

Myself: past & present

Past background

Dec 2007: defending my master thesis in Particle Physics at the University of Milano–Bicocca

2008: design of the LHCb muon automation system

Present status

Host institute: CERN

Project: Micro Pattern Gas Detectors

Supervisor: Leszek Ropelewski

PhD advisor: Ian Brock (Bonn University)

Playing with GEMs...¹

Gas Electron
Multipliers

Playing with GEMs...²

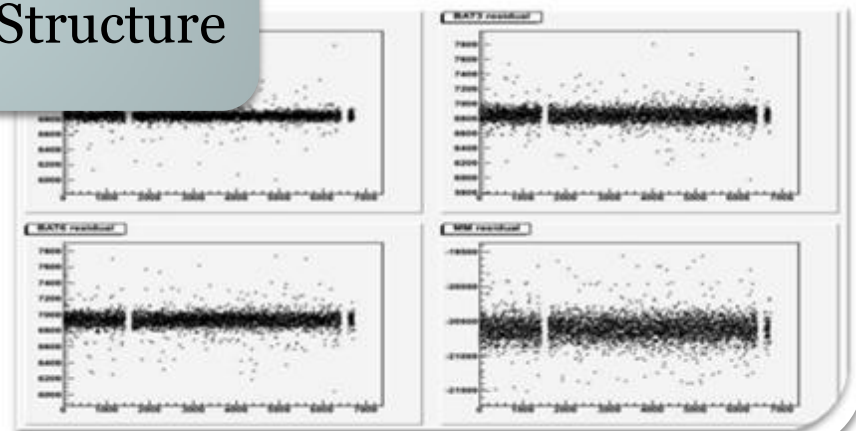

Large area? Yes, we can!

- Simulate GEM properties with Garfield
- Test GEM samples
- Find ways to improve the technology
- ...and iterate the process...
- The latest single mask photolithographic technique with electrochemical active corrosion protection allows us to build new GEMs:
 - large: up to 50 x 200 cm
 - performing: compatible with std GEMs
 - suitable for mass production: in industry
 - cheap: price reduction by factor 100

...and having fun with Micromegas¹

Micro Mesh
Gaseous Structure

...and having fun with Micromegas²

Upgrading ATLAS CSCs

- Study the space resolution as a function of the strip pitch
- Find ways to reduce sparks with high background
- Fully characterize a GEM+ μ M prototype
- Test new Micromegas technologies
- ...and iterate the process...
- The latest capacitively coupled resistive strip Micromegas have:
 - no voltage drop in case of sparks
 - μ -TPC capability
 - (efficiency study ongoing)

Milestones & deliverables

Milestones

☺ Small prototype single mask GEM available (m3 – Feb 2009)

☺ Full scale prototype single mask GEM available (m15 – Feb 2010)

Deliverables

☺ Characterization of single mask GEM small prototype (m9 – Ago 2009)

☹ Technology assessment report on single mask GEMs (m33 – Ago 2011)

Me: a trainee...

Technical training...

1st EIROforum School on Instrumentation
MC-PAD network training on Readout Electronics
MC-PAD network training on Detector Simulation and Data Analysis
C++ programming courses
MC-PAD network training on Processing and Radiation Hardness

...and complementary training

general and professional French courses
communication courses on oral and poster presentations
EuroScience Open Forum Marie Curie Event

...and a trainer 😊

GEM and Micromegas detector design and assembly training (Feb 2009)

*Supervision:
3 students in summer 2009
4 students in summer 2010
n students in summer 2011?*

Last but not least...
