

Workshop on forward physics and QCD with LHC, EIC, and cosmic rays

Wednesday, January 20, 2021 - Saturday, January 23, 2021

Book of Abstracts

Contents

Introduction to workshop	1
From pA to eA at EIC	1
Very forward phenomena in pA and UPC	1
LHC/Alice results relevant to EIC	1
Proton-lead and photo nuclear collisions at LHC	1
From pA to eA at EIC	1
Proton-lead and photo nuclear collisions at LHC	1
Transverse momentum dependence of single spin asymmetries for very forward neutron production in polarized p+p collisions at $\sqrt{s} = 200$ GeV	2
Discussion	2
Photon Exchange	2
Photoproduction of vectors mesons	2
Non-elastic contributions for the production of high-mass pairs	2
Discussion	2
Cosmic ray physics experimental review	2
pO run for cosmic rays and impact on muon puzzle	3
Cosmic Ray MC	3
Discussion	3
Coherent processes on light ions	3
Nuclear shadowing in coherent processes	3
Photoproduction at EIC	3
Discussion	3
CMS diffractive results	3
Gluon TMDs at small x	4

FOCAL	4
Elastic and diffractive proton–proton scattering at RHIC	4
Factorization, resummation and CGC negative cross section problem	4
Effective field theory for heavy ions	4
Recent results in low-x (exclusive VM)	4
Discussion	5
PPS	5
AFP	5
Timing detectors	5
Very forward hadron spectrometer	5
FASER	5
Discussion	5
Workshop summary and close out	5
TOTEM/D0 odderon discovery	6
Effective gluon mass and strong interaction	6
Forward Physics with LHCb	6
Coherent and diffractives processes at EIC	6
EIC forward detection	6
Selected results on forward dijets	6

1

Introduction to workshop

Corresponding Author: weiss@jlab.org

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 2

From pA to eA at EIC

Corresponding Author: sievertmd@gmail.com

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 3

Very forward phenomena in pA and UPC

Corresponding Author: mxs43@psu.edu

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 4

LHC/Alice results relevant to EIC

Corresponding Author: laure.marie.massacrier@cern.ch

5

Proton-lead and photo nuclear collisions at LHC

Corresponding Author: mjmurray@ku.edu

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 6

From pA to eA at EIC

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 7

Proton-lead and photo nuclear collisions at LHC

Corresponding Author: mjmurray@ku.edu

Diffraction and low-x physics / 8

Transverse momentum dependence of single spin asymmetries for very forward neutron production in polarized p+p collisions at $\sqrt{s} = 200$ GeV

Corresponding Author: benard.mulilo@riken.jp

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 9

Discussion

Ultrapерipheral pA/AA and photoproduction γ -p/ γ -A / 10

Photon Exchange

Corresponding Author: c.baldenegro@cern.ch

Ultrapерipheral pA/AA and photoproduction γ -p/ γ -A / 11

Photoproduction of vectors mesons

Corresponding Author: daniel.tapia.takaki@cern.ch

Ultrapерipheral pA/AA and photoproduction γ -p/ γ -A / 12

Non-elastic contributions for the production of high-mass pairs

Corresponding Author: gustavo.silveira@cern.ch

Ultrapерipheral pA/AA and photoproduction γ -p/ γ -A / 13

Discussion

Cosmic rays: Joint physics studies with collider experiments, simulation tools / 14

Cosmic ray physics experimental review

Corresponding Author: tsako@icrr.u-tokyo.ac.jp

Cosmic rays: Joint physics studies with collider experiments, simulation tools / 15

pO run for cosmic rays and impact on muon puzzle

Corresponding Author: hans.peter.dembinski@cern.ch

Cosmic rays: Joint physics studies with collider experiments, simulation tools / 16

Cosmic Ray MC

Corresponding Author: tanguy.pierog@kit.edu

Cosmic rays: Joint physics studies with collider experiments, simulation tools / 17

Discussion

Coherent and diffractive scattering on heavy and light nuclei / 18

Coherent processes on light ions

Corresponding Author: sergio.scopetta@pg.infn.it

Coherent and diffractive scattering on heavy and light nuclei / 19

Nuclear shadowing in coherent processes

Corresponding Author: vadim.guzey@cern.ch

Coherent and diffractive scattering on heavy and light nuclei / 20

Photoproduction at EIC

Corresponding Author: jrstevens01@wm.edu

Coherent and diffractive scattering on heavy and light nuclei / 21

Discussion

Diffraction and low-x physics / 22

CMS diffractive results

Corresponding Author: deniz.sunar.cerci@cern.ch

Diffraction and low-x physics / 23

Gluon TMDs at small x

Corresponding Author: francescogiovanni.celiberto@unipv.it

Forward detectors: What exists? What can be built for EIC? / 24

FOCAL

Corresponding Author: constantin.loizides@cern.ch

Diffraction and low-x physics / 25

Elastic and diffractive proton–proton scattering at RHIC

Corresponding Author: guryn@bnl.gov

Diffraction and low-x physics / 26

Factorization, resummation and CGC negative cross section problem

Corresponding Author: lhynkcp2009@gmail.com

Diffraction and low-x physics / 27

Effective field theory for heavy ions

Corresponding Author: varunastro@gmail.com

Diffraction and low-x physics / 28

Recent results in low-x (exclusive VM)

Corresponding Author: martin.hentschinski@gmail.com

Diffraction and low-x physics / 29

Discussion

Forward detectors: What exists? What can be built for EIC? / 30

PPS

Corresponding Author: ja.williams@cern.ch

Forward detectors: What exists? What can be built for EIC? / 31

AFP

Corresponding Author: jesse.liu@cern.ch

Forward detectors: What exists? What can be built for EIC? / 32

Timing detectors

Corresponding Author: tommasoisi@gmail.com

Forward detectors: What exists? What can be built for EIC? / 33

Very forward hadron spectrometer

Corresponding Author: michael.albrow@cern.ch

Forward detectors: What exists? What can be built for EIC? / 34

FASER

Corresponding Author: flxkling@gmail.com

Forward detectors: What exists? What can be built for EIC? / 35

Discussion

Workshop summary and close out

Diffraction and low-x physics / 37

TOTEM/D0 odderon discovery

Corresponding Author: christophe.royon@cern.ch

Diffraction and low-x physics / 38

Effective gluon mass and strong interaction

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 39

Forward Physics with LHCb

Corresponding Author: eliane.epple@cern.ch

Coherent and diffractive scattering on heavy and light nuclei / 40

Coherent and diffractives processes at EIC

Corresponding Author: weiss@jlab.org

Coherent and diffractive scattering on heavy and light nuclei / 41

EIC forward detection

Corresponding Author: alexmichaeljentsch@gmail.com

From pA at RHIC/LHC to eA at EIC: What can pA do to prepare for eA? / 42

Selected results on forward dijets

Corresponding Author: krzysztof.kutak@ifj.edu.pl
