

Virtual Conference of the Polish Society on Relativity 2020

Thursday 24 September 2020

Relativistic Astrophysics (14:30 - 17:35)

time	[id] title	presenter
14:30	[80] Simulations of Supermassive Black Hole Binaries on their way to Merger	CAMPANELLI, Manuela
15:15	[81] Hydrodynamics of superfluid neutron stars	HASKELL, Brynmor
15:45	[82] GRBs pancromatic events observed even to the GEV ad TeV emission and their implications as cosmological standard candles	DAINOTTI, Maria
16:15	[24] Mutual interaction of binary black hole and misaligned circumbinary disk	PIRÓG, Michał
16:35	[45] Galactic Center S cluster as a reservoir of strong-gravity probes	ZAJACEK, Michal
16:55	[21] Transonic accretion flow with time-dependent boundary conditions in HARM.	PALIT, Ishika
17:15	[75] Moving away from the Near-Horizon Attractor of the Extreme Kerr Force-Free Magnetosphere	CAMILLONI, Filippo
