

Virtual Conference of the Polish Society on Relativity 2020

Saturday 26 September 2020

Beyond General Relativity (14:30 - 17:35)

time	[id] title	presenter
14:30	[83] Lessons for quantum cosmology from anti-de Sitter black holes	HELLER, Michal P.
15:15	[13] Early evolutionary tracks of low-mass stars in modified gravity	WOJNAR, Aneta
15:45	[84] Aspects of AdS/CFT at finite cut-off	CAPUTA, Pawel
16:15	[37] Covariant actions for bouncing cosmology in modified Gauss-Bonnet gravity theories	VERNIERI, Daniele
16:35	[51] Canonical variational completion of 4D Gauss-Bonnet gravity	HOHMANN, Manuel
16:55	[58] Neutrino oscillations in extended theories of gravity	PETRUZZIELLO, Luciano
17:15	[64] The Teleparallel version of Horndeski gravity	BAHAMONDE, Sebastian
