

# 30th International Symposium on Lepton Photon Interactions at High Energies

Contribution ID: 149

Type: **Poster**

## t-quark physics at ILC

*Monday 10 January 2022 16:31 (1 minute)*

The top quark has not yet been studied in the extremely favorable and low-background environment of  $e^+e^-$  annihilation. This talk will review the opportunities for precision measurements of the top quark properties at the International Linear Collider. These include the archival measurement of the top quark mass, the search for beyond-Standard-Model contributions to the top quark electroweak form factors, and the search for CP violation in the top quark couplings.
