Study of heavy b and c baryons at LHCb

Tuesday, 11 January 2022 14:40 (20 minutes)

LHCb has recently measured the properties and production of many known charm and beauty baryons, as well as discovered many previously unobserved states. The latest results from the LHCb Collaboration on heavy flavoured baryons are presented.

Primary author: NEUBERT, Sebastian (University of Bonn (DE))

Presenter: GORELOV, Igor (M.V. Lomonosov Moscow State University (RU))

Session Classification: Precision SM Measurements

Track Classification: Standard Model
