

# 30th International Symposium on Lepton Photon Interactions at High Energies

Contribution ID: 95

Type: **Parallel session talk**

## Searches for leptoquarks with the ATLAS detector

*Wednesday, January 12, 2022 10:28 AM (16 minutes)*

Leptoquarks (LQ) are predicted by many new physics theories to describe the similarities between the lepton and quark sectors of the Standard Model and offer an attractive potential explanation for the lepton flavour anomalies observed at LHCb and flavour factories. The ATLAS experiment has a broad program of direct searches for leptoquarks, coupling to the first-, second- or third-generation particles. This talk will present the most recent 13 TeV results on the searches for leptoquarks and contact interactions with the ATLAS detector, covering flavour-diagonal and cross-generational final states.

**Primary author:** ATLAS COLLABORATION

**Presenter:** VAZQUEZ SCHROEDER, Tamara (CERN)

**Session Classification:** Beyond the Standard Model

**Track Classification:** Beyond the Standard Model
