

30th International Symposium on Lepton Photon Interactions at High Energies

Contribution ID: 97

Type: **Parallel session talk**

Searches for new phenomena in final states with 3rd generation quarks using the ATLAS detector

Wednesday 12 January 2022 10:12 (16 minutes)

Many theories beyond the Standard Model predict new phenomena, such as heavy vectors or scalar, and vector-like quarks, in final states containing bottom or top quarks. Such final states offer great potential to reduce the Standard Model background, although with significant challenges in reconstructing and identifying the decay products and modelling the remaining background. The recent 13 TeV pp results, along with the associated improvements in identification techniques, will be reported.

Author: ATLAS COLLABORATION

Presenter: BURGER, Angela Maria (Oklahoma State University (US))

Session Classification: Beyond the Standard Model

Track Classification: Beyond the Standard Model
