

Longitudinal double spin asymmetry and cross-section of neutral and charged pion production in polarized p+p collisions at 200GeV

Tuesday 17 April 2007 14:00 (20 minutes)

Recent STAR results on hadron production in polarized p+p collisions at 200GeV at RHIC

Author: SIMON, Frank (MIT)

Presenter: SIMON, Frank (MIT)

Session Classification: Spin Physics

Track Classification: Spin Physics
