

# DIS 2007

## Wednesday 18 April 2007

### **Joint: Diffraction and Vector Mesons / Spin Physics: DIFF-7 / SPIN-6 - Forum 8 (14:00 - 15:40)**

time	[id] title	presenter
14:00	[83] Exclusive meson production at NLO	DIEHL, Markus
14:20	[90] Obtaining generalized parton distributions from hadronic observables and lattice QCD	LIUTI, Simonetta
15:00	[86] Transverse target spin asymmetries of exclusive rho0 mesons at HERMES	ROSTOMYAN, Armine
15:20	[247] Are generalized and transverse momentum dependent parton distributions related?	METZ, Andreas

### **Joint: Diffraction and Vector Mesons / Spin Physics: DIFF-8 / SPIN-7 - Forum 8 (16:10 - 18:00)**

time	[id] title	presenter
16:10	[87] Measurement of coherent and incoherent DVCS at HERMES from nuclear targets	GULER, Hayg
16:30	[88] HERMES measurement of DVCS from p and d targets, and status and prospects of the recoil detector	MUSSGILLER, Andreas
16:55	[89] DVCS in Hall A	VOUTIER, Eric
17:20	[84] Double spin asymmetry for exclusive pi+ production	PIERCE, Josh
