

Extract of the S'Cool LAB's Covid19 procedure

...

- For the duration of an activity or program, the participants are assigned one chair and one table. Participants should remain at their assigned chair as much as possible throughout the lectures.

...

- When entering, all participants disinfect their hands and put on a safety masks if they do not wear one yet.
- The masks can be put down only if
 - o the participants keep the 2m distance for a longer duration, i.e.: all participants remain seated at their assigned table/chair.
 - o The participants respect the procedure to handle their mask described below.*

...

*Procedure to put down and back on a mask: The mask can be put off, for example, to drink a glass of water, if one cleans their hands correctly before removing the mask and then hold it by the elastic bands without letting it touch any surface. But as soon as the mask is removed and touches a surface which is potentially dirty, it must be thrown away and replaced. Temporarily a mask can be put on a clean sheet of paper and reused. The piece of paper must be thrown afterwards.
