# Preparation for 2021 Run

## ➤ **Issue**

- 6 VME crates for Shapers are rented from electronic pool
- Power supplies and fan units became unstable, not supported by electronic pool, still can be exchanged if available

## ➤ **Solution**

- Exchange VME PS by low cost not VME commercial PS, only +5V and -5V needed
- Purchase VME bins without fans and modify them for new PS

## ➤ **Plans and status**

- VME PS and fan trays are back to electronic pool, VME bins still to be purchased by COMPASS
- Modification of VME bins in September-October by a technician from Protvino, travel restrictions
- More probably will not be completed before the dry run

THANK YOU
