

Update SFGD Mechanics

A. Gendotti, D. Sgalaberna 28.09.2020

- Measurements of the Sandwich Prototype received (Document is uploaded)
 - 1 pin-hole was set as reference hole
 - Pin-holes at +/- 2m distance from the reference reached ~100µm precision (as was told from the company already).
 - We are checking now Pin.Holes position according to the relative pocket (connector holes) and it seems that tolerance is below 50µm.
 - As soon as we finish check the measurement we will upload the Document.
-
- CompositeDesign is preparing the 200mmx200mm acrylic sandwich prototype. Up to now no feedback if there are any issues.
-
- FEA: Performing now a dynamic study of the Box. Should have results for the next mechanics meeting.
