

# *LHC-EW WG: Jets and EW bosons*

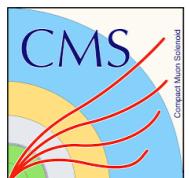

## Jet substructure mini workshop

Oct. 19, 2020

*Co-Conveners:*

Eram Rizvi and Benjamin Nachman

Vieri Candelise, Mikko Voutilainen, Hannes Jung

Stephen Farry and Will Barter

THEORY

James Mulligan and Nima Zardoshti

Marek Schoenherr

# Briefly, information about the group

We meet on Mondays at 4:30 PM CERN

<https://indico.cern.ch/category/3290/>

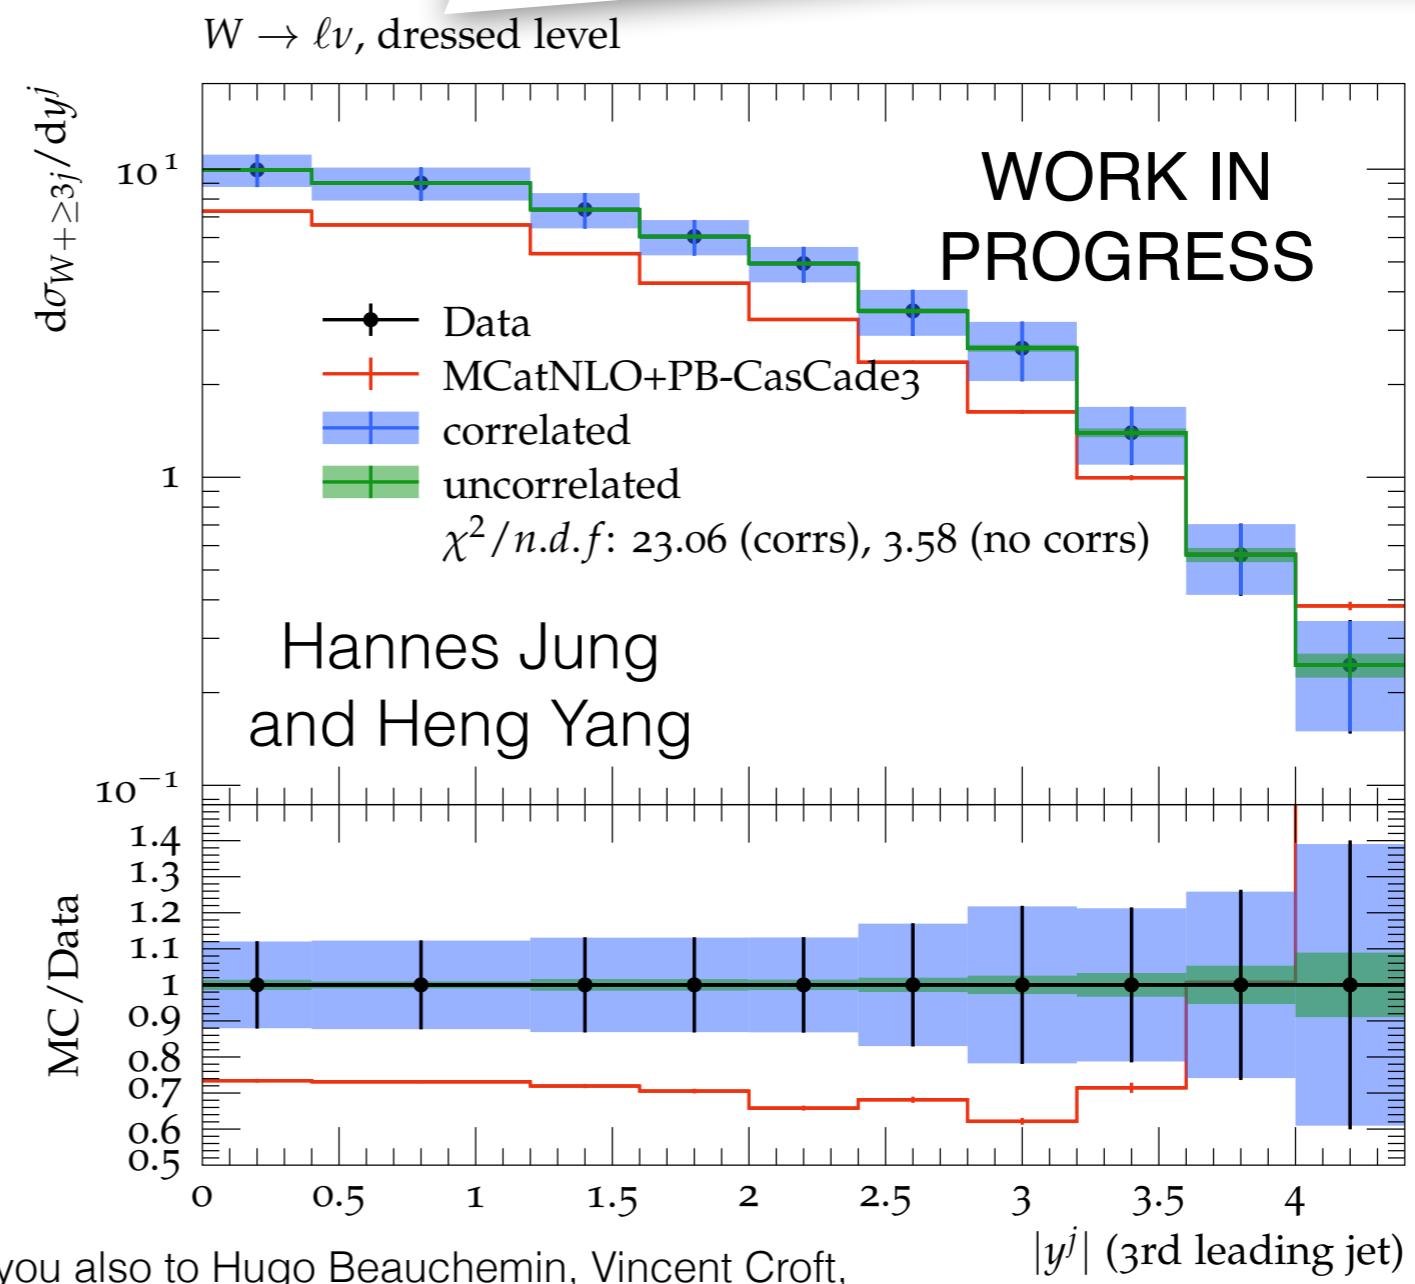

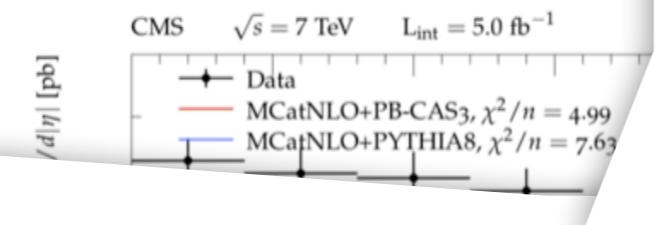

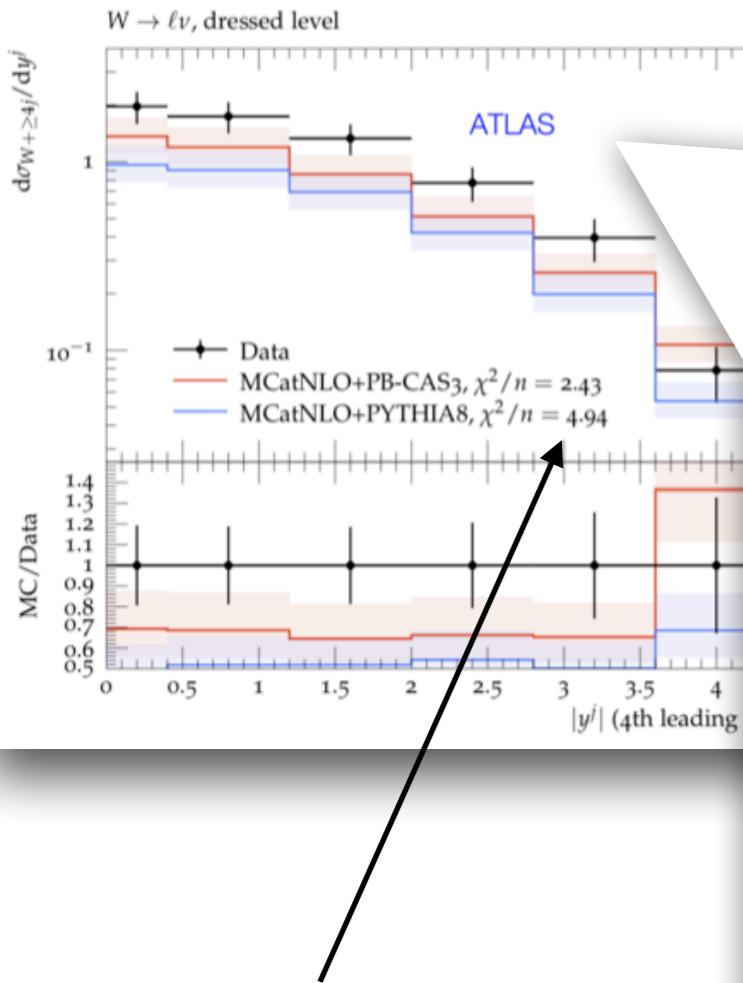

<https://twiki.cern.ch/twiki/bin/view/LHCPhysics/EWWG2>

Today, next week, and the week after:  
Jet substructure mini-workshop!

Before that, we will start with a brief recap of the LHC EW working group general meeting from two weeks ago.

# Benchmark Comparisons

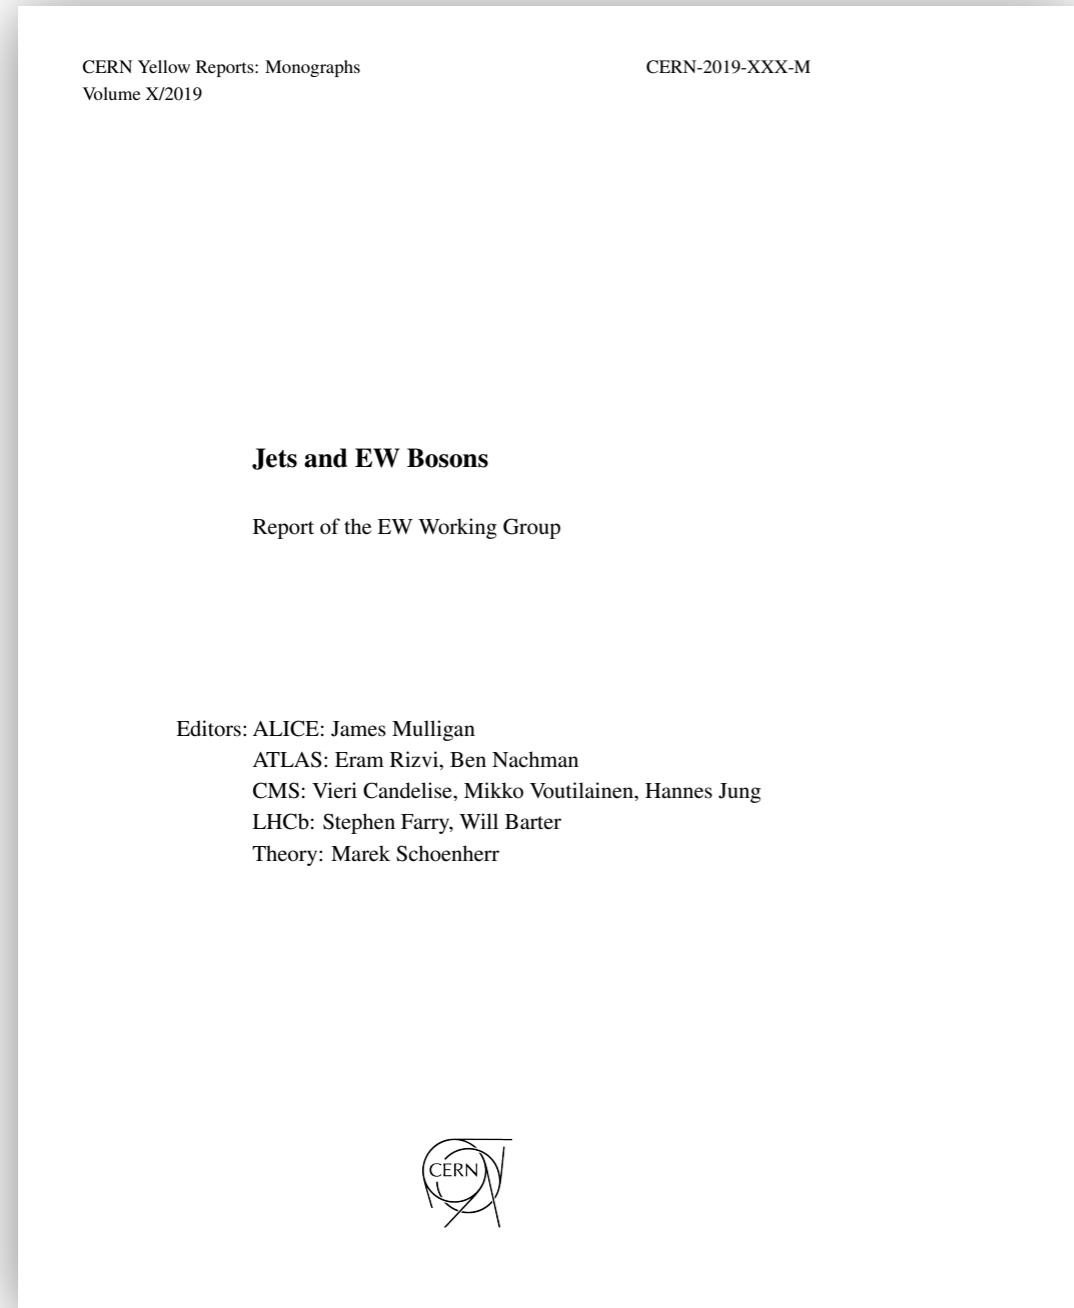

Thank you also to Hugo Beauchemin, Vincent Croft,  
Alec Drobac (Tufts) for last minute plots!

We discussed benchmark comparisons. Two points of discussion came up: *what about “unfold/refold” when binning is different? Where do intrinsic  $k_T$  studies belong?*

Not yet full covariance matrix, but have **the information and setting that up.**

# Yellow Report Status

The report itself has basic structure, but work is ongoing. The conveners wanted to know our timeline - this is something we should discuss in an upcoming meeting.

## Contents

<b>1 Benchmark Comparisons</b>	<b>Coordinators: V. Candeliese, H. Jung</b>	1
1.1 Jets . . . . .		1
1.2 Boson and Jets . . . . .		1
<b>2 LHC Tune</b>	<b>Coordinators: H. Jung, M. Schoenherr</b>	3
2.1 Determination of intrinsic $k_T$ . . . . .		3
<b>3 Jetsubstructure</b>	<b>Coordinators: Ben Nachman and James Mulligan</b>	5
<b>4 Systematic Uncertainty Treatment and Correlations</b>	<b>Coordinator: L. Corpe</b>	7
4.1 Introduction . . . . .		7
4.2 Current workflow to preserve analysis results . . . . .		7
4.3 Limitations of current recommendations for HEPData entries . . . . .		8
4.4 Three scenarios for analysis preservation . . . . .		9
4.4.1 Scenario A - Minimum Requirements for Analysis Preservation . . . . .		9
4.4.2 Scenario B - Approximate Re-interpretability . . . . .		9
4.4.3 Scenario C - Maximum Re-interpretability . . . . .		10

...and now on to the main event!

# *LHC-EW WG: Jets and EW bosons* Jet substructure mini workshop

# Precision Jet Substructure

*A unique setting for  
studying the strong  
force at high energy!*

6

(1) (Beyond the) Standard model parameters

$\alpha_s$  (including running),  $m_{top}$ , EFTs, Higgs self coupling, ...

(2) Unique tests of fundamental physics, including unique probes of high energy / collective behavior of the strong force.

interference & entanglement, dead cone, ...

(3) Direct searches for new particles

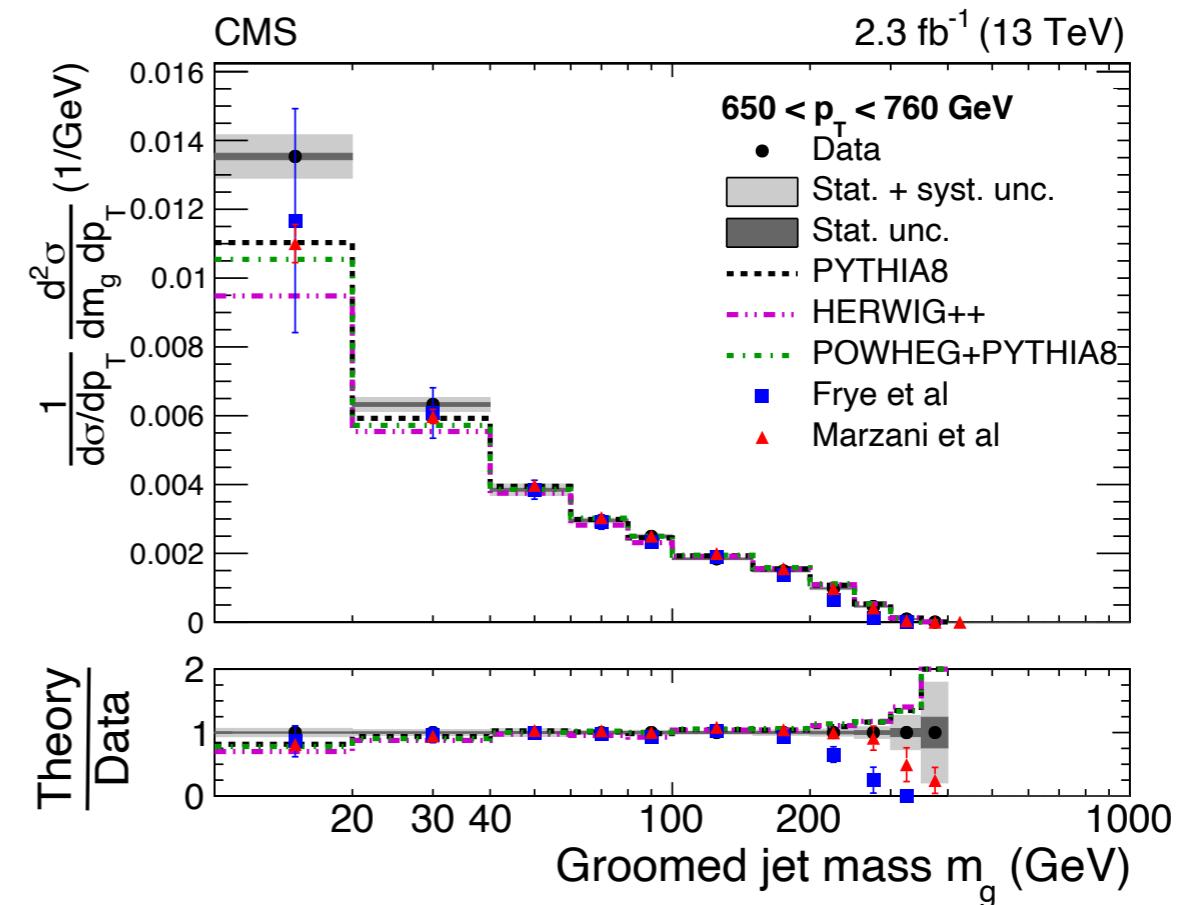

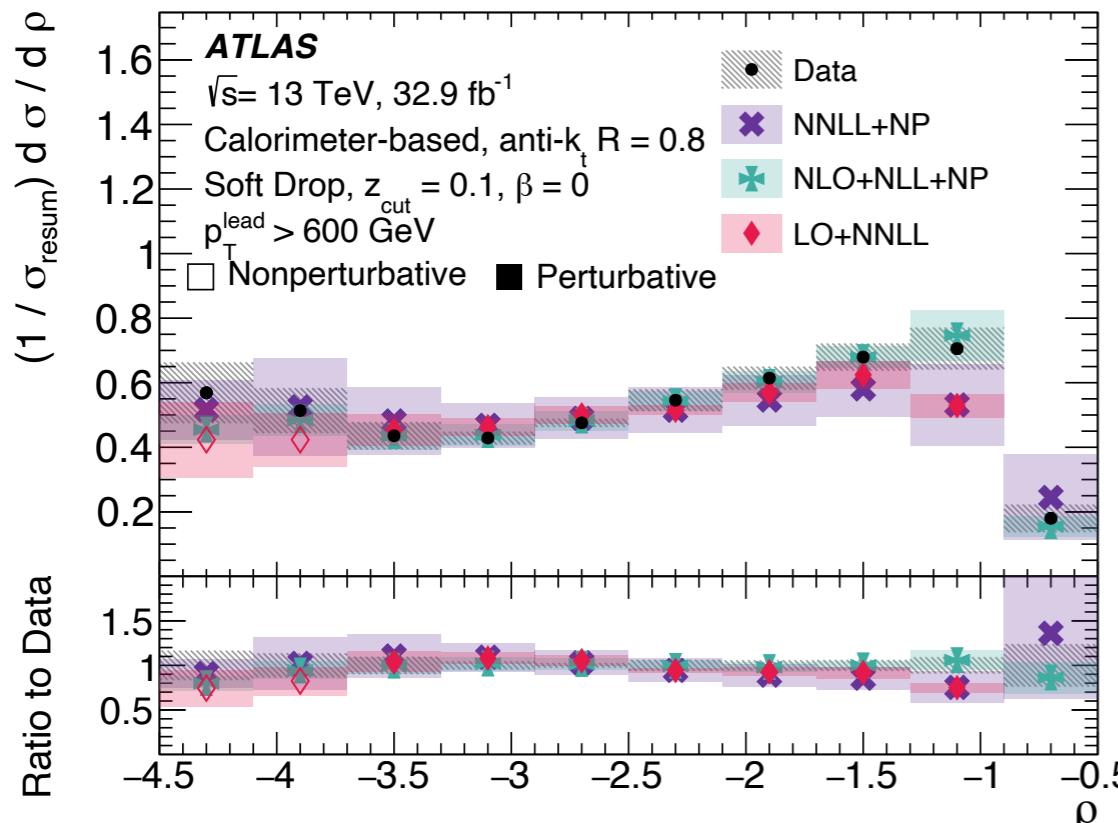

Final states with boosted bosons, top quarks, ...

(4) General-purpose Monte Carlo generator development and tuning

higher-order corrections, empower other measurements / searches, ...

# Thinking towards a combined future

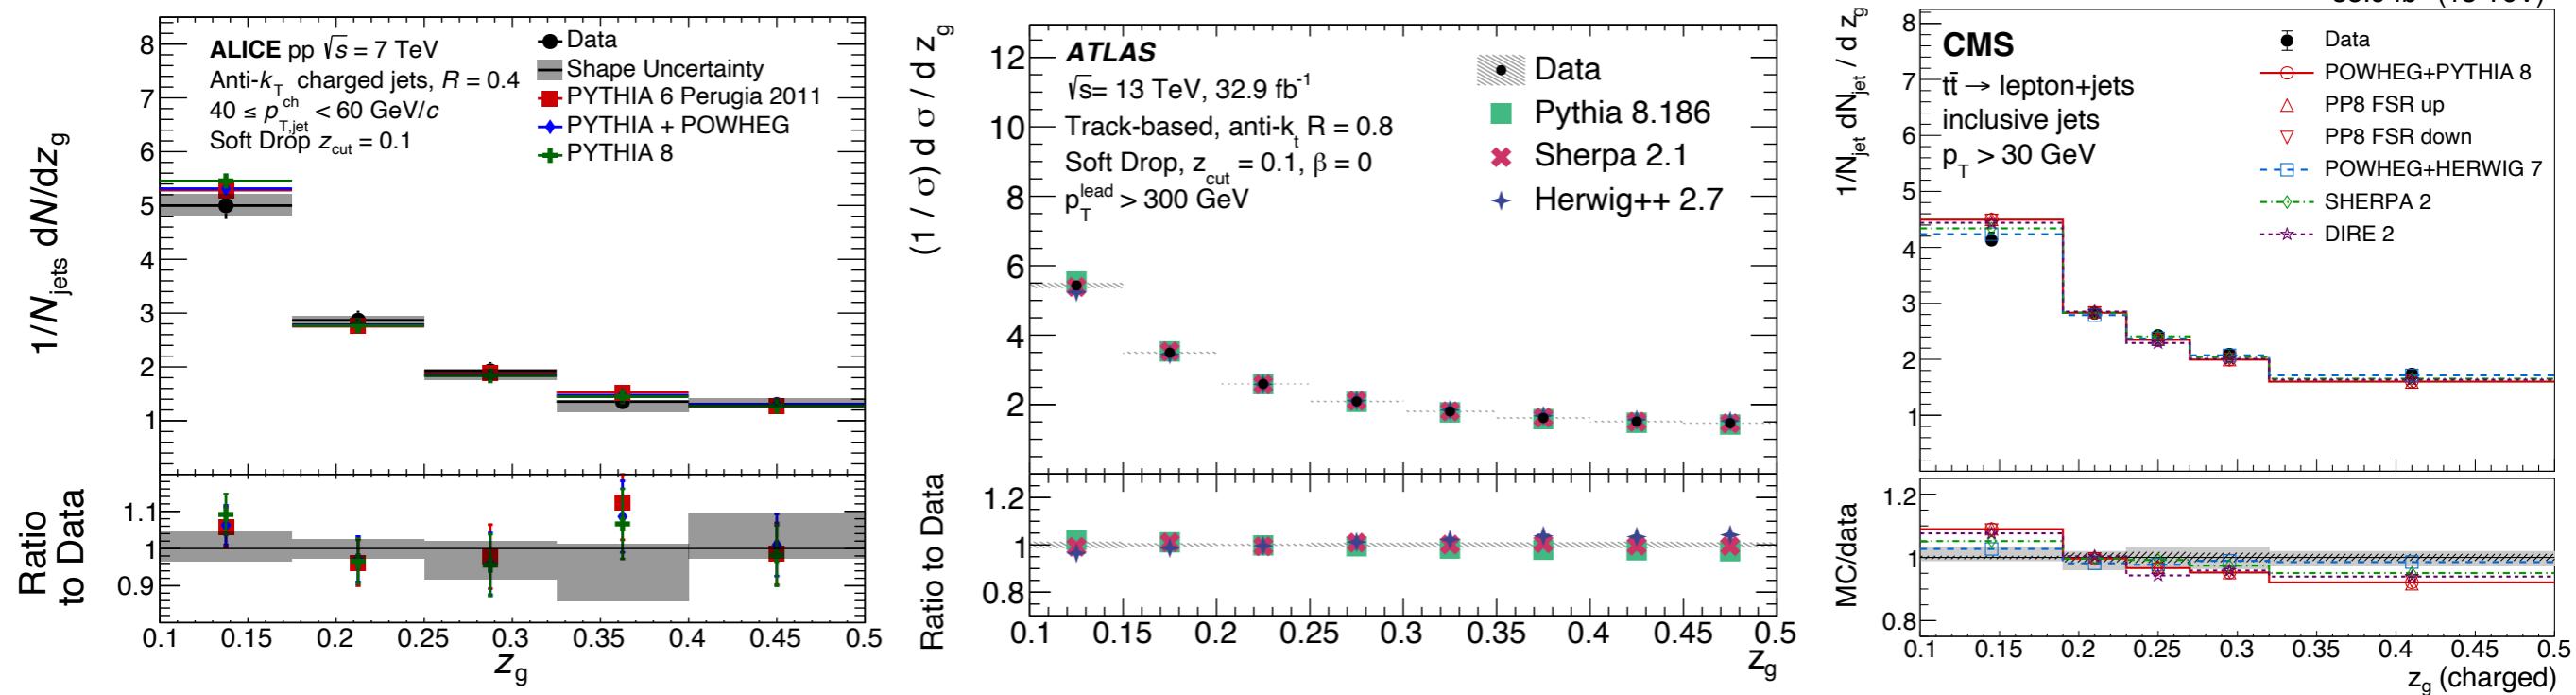

*One challenge with existing measurements is that the observables and/or binning is different so direct comparisons are not possible.*

*Many of our measurements are not stats limited, so a combination may not be useful, but a comparison would be a very useful exercise with the potential to improve individual measurements in the future.*

# Thinking towards a combined future

*One challenge with existing measurements is that the observables and/or binning is different so direct comparisons are not possible.*

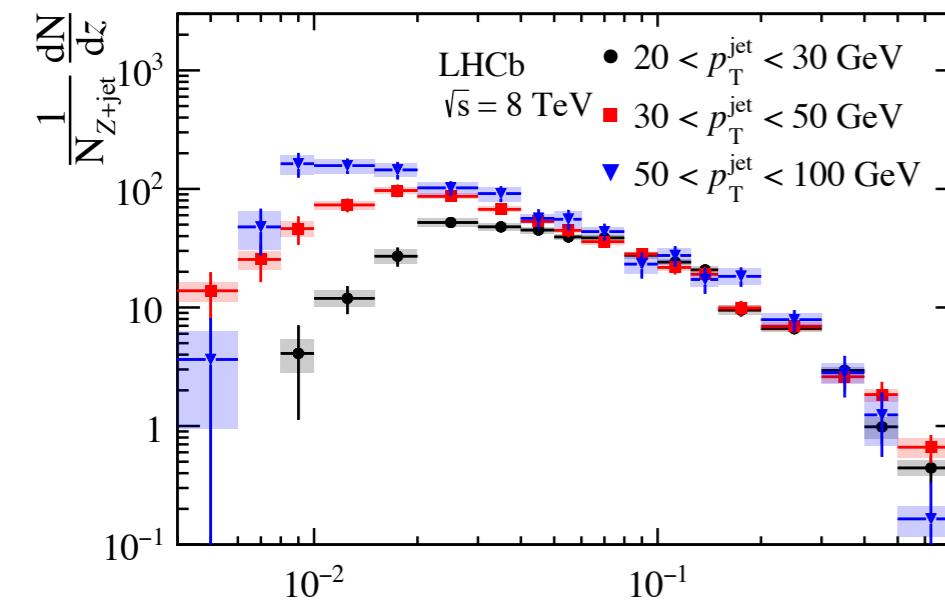

Momentum fraction of  
“hardest splitting” inside jet

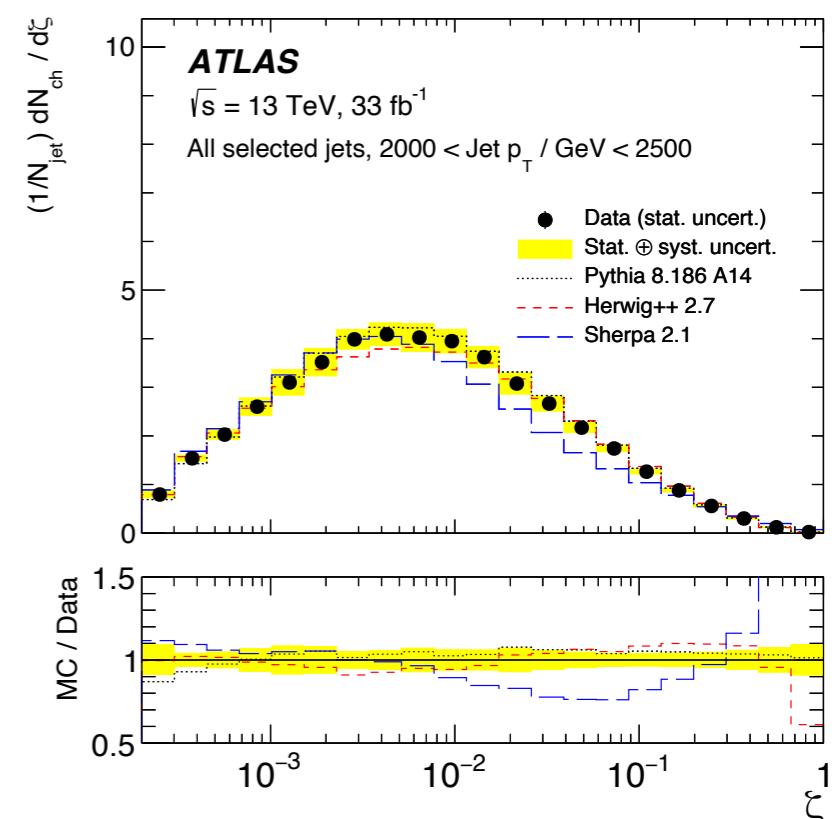

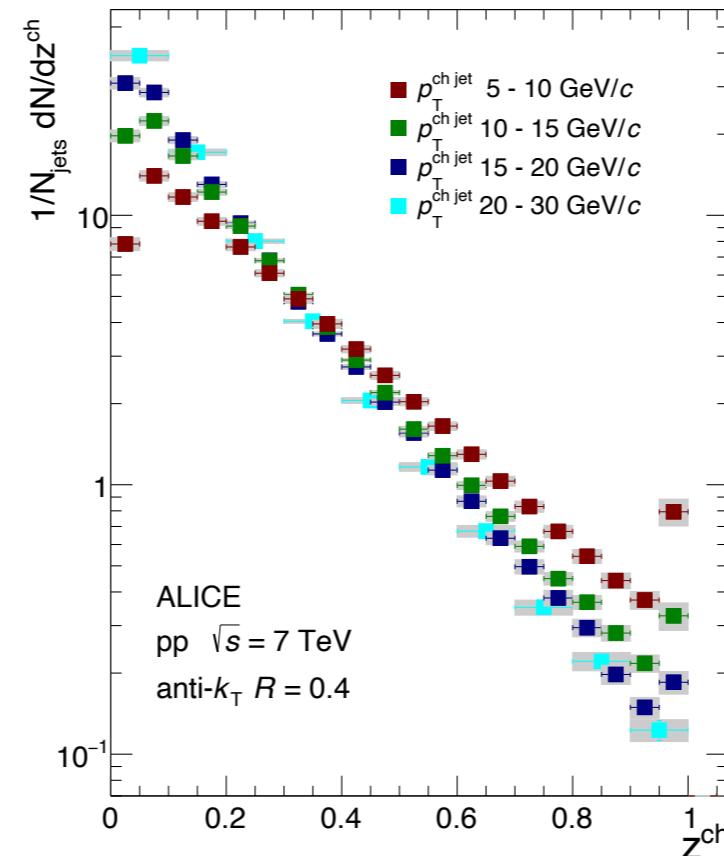

*Many of our measurements are not stats limited, so a combination may not be useful, but a comparison would be a very useful exercise with the potential to improve individual measurements in the future.*

# Thinking towards a combined future

*One challenge with existing measurements is that the observables and/or binning is different so direct comparisons are not possible.*

Momentum fraction of hadrons inside jets

*Many of our measurements are not stats limited, so a combination may not be useful, but a comparison would be a very useful exercise with the potential to improve individual measurements in the future.*

10

# Now, for the workshop program!

MONDAY, 19 OCTOBER

**16:30 → 18:00 Jet substructure: ATLAS, ALICE**

**Conveners:** Ben Nachman (Lawrence Berkeley National Lab. (US)), James Mulligan (University of California, Berkeley (US))

16:30	<b>Introduction</b>	⌚ 10m	
	<b>Speakers:</b> Ben Nachman (Lawrence Berkeley National Lab. (US)), James Mulligan (University of California, Berkeley (US))		
16:40	<b>Jet substructure with ATLAS</b>	⌚ 30m	
	<b>Speaker:</b> Jennifer Kathryn Roloff (Brookhaven National Laboratory (US))		
17:10	<b>Jet substructure with ALICE</b>	⌚ 30m	
	<b>Speaker:</b> Nima Zardoshti (CERN)		

MONDAY, 26 OCTOBER

**16:30 → 18:00 Jet substructure: CMS, Theory**

**Conveners:** Ben Nachman (Lawrence Berkeley National Lab. (US)), James Mulligan (University of California, Berkeley (US))

16:30	<b>Introduction</b>	⌚ 10m	
	<b>Speakers:</b> Ben Nachman (Lawrence Berkeley National Lab. (US)), James Mulligan (University of California, Berkeley (US))		
16:40	<b>Jet substructure with CMS</b>	⌚ 30m	
	<b>Speaker:</b> Andreas Hinzmann (Hamburg University (DE))		
17:10	<b>Jet substructure: Theory</b>	⌚ 30m	
	<b>Speaker:</b> Kyle Lee (LBNL)		

MONDAY, 2 NOVEMBER

**16:30 → 18:00 Jet substructure: LHCb, Theory**

**Conveners:** Ben Nachman (Lawrence Berkeley National Lab. (US)), James Mulligan (University of California, Berkeley (US))

16:30	<b>Introduction</b>	⌚ 10m	
	<b>Speakers:</b> Ben Nachman (Lawrence Berkeley National Lab. (US)), James Mulligan (University of California, Berkeley (US))		
16:40	<b>Jet substructure with LHCb</b>	⌚ 30m	
	<b>Speaker:</b> Sook Hyun Lee (University of Michigan (US))		
17:10	<b>Jet substructure: Theory</b>	⌚ 30m	
	<b>Speaker:</b> Andrew Larkoski (Reed College)		

# Questions?
