

Geant4 & HEED Simulation Ionization Energy Loss

Mary Tsagri

Geant4 Weekly Meeting: 31st May 2010

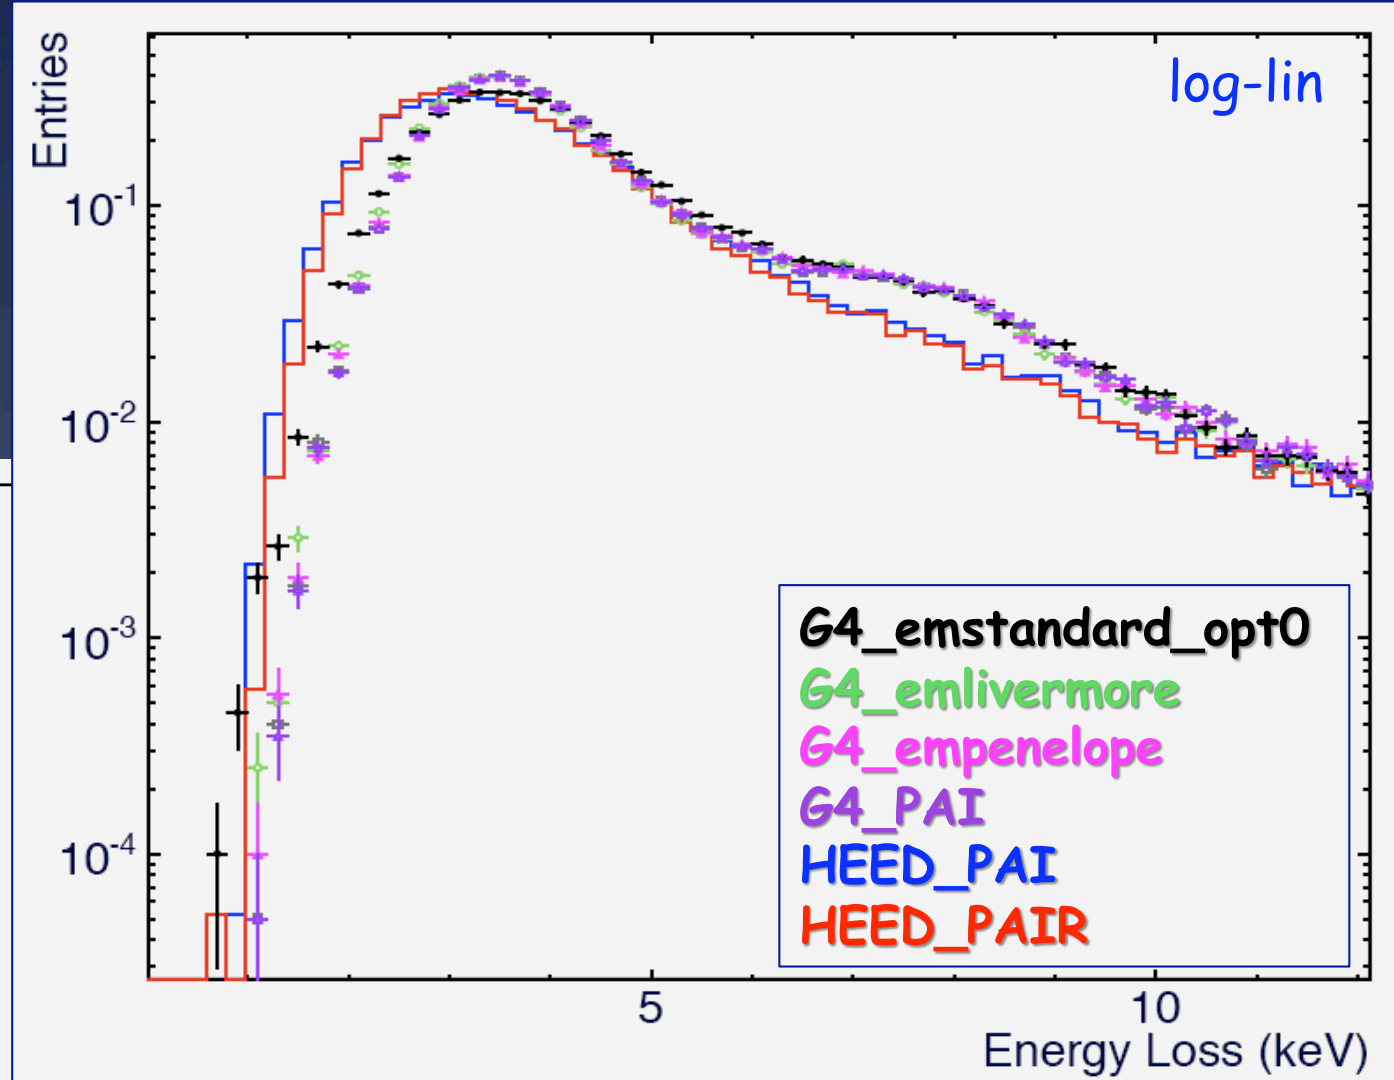

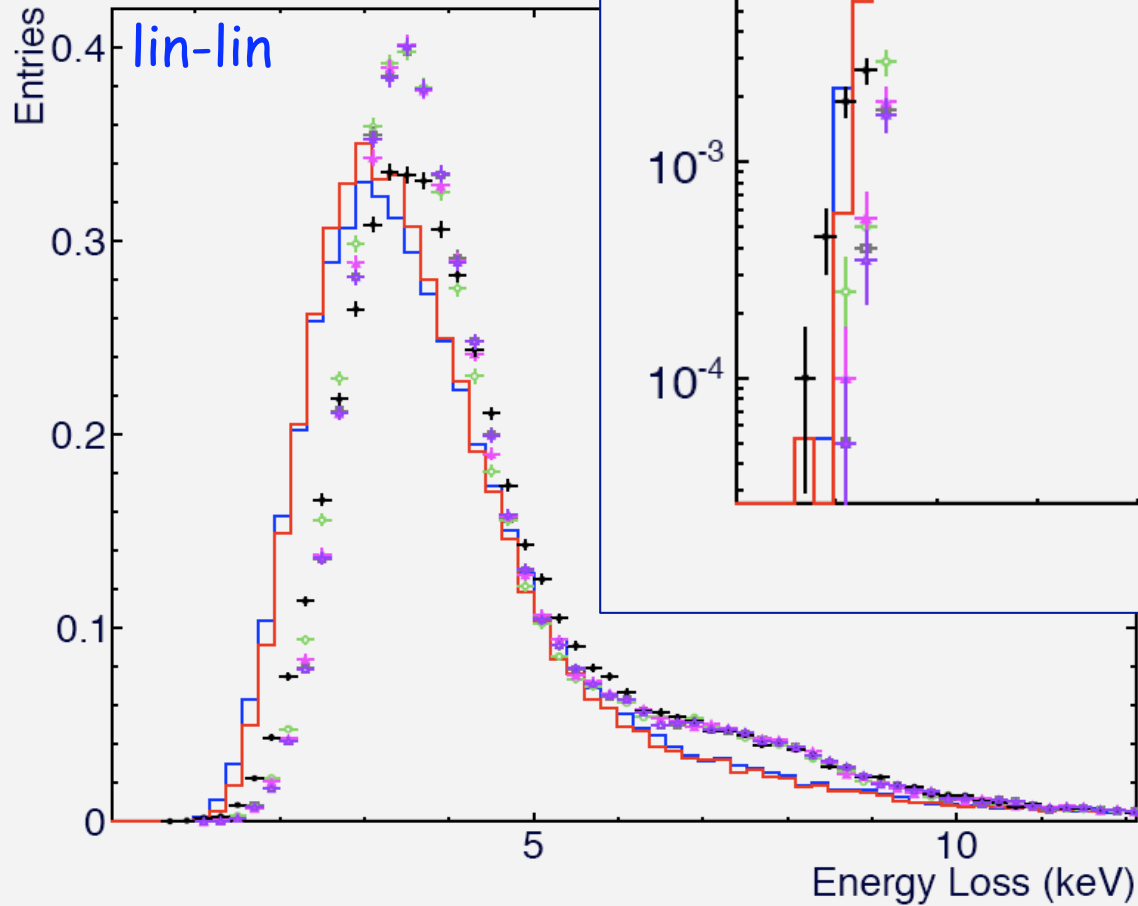

G4 9.3.p01 (EM TestEm5)

G4 Physics Lists: **emstandard_opt0**
emstandard_opt3
emlivermore
empenelope
PAI

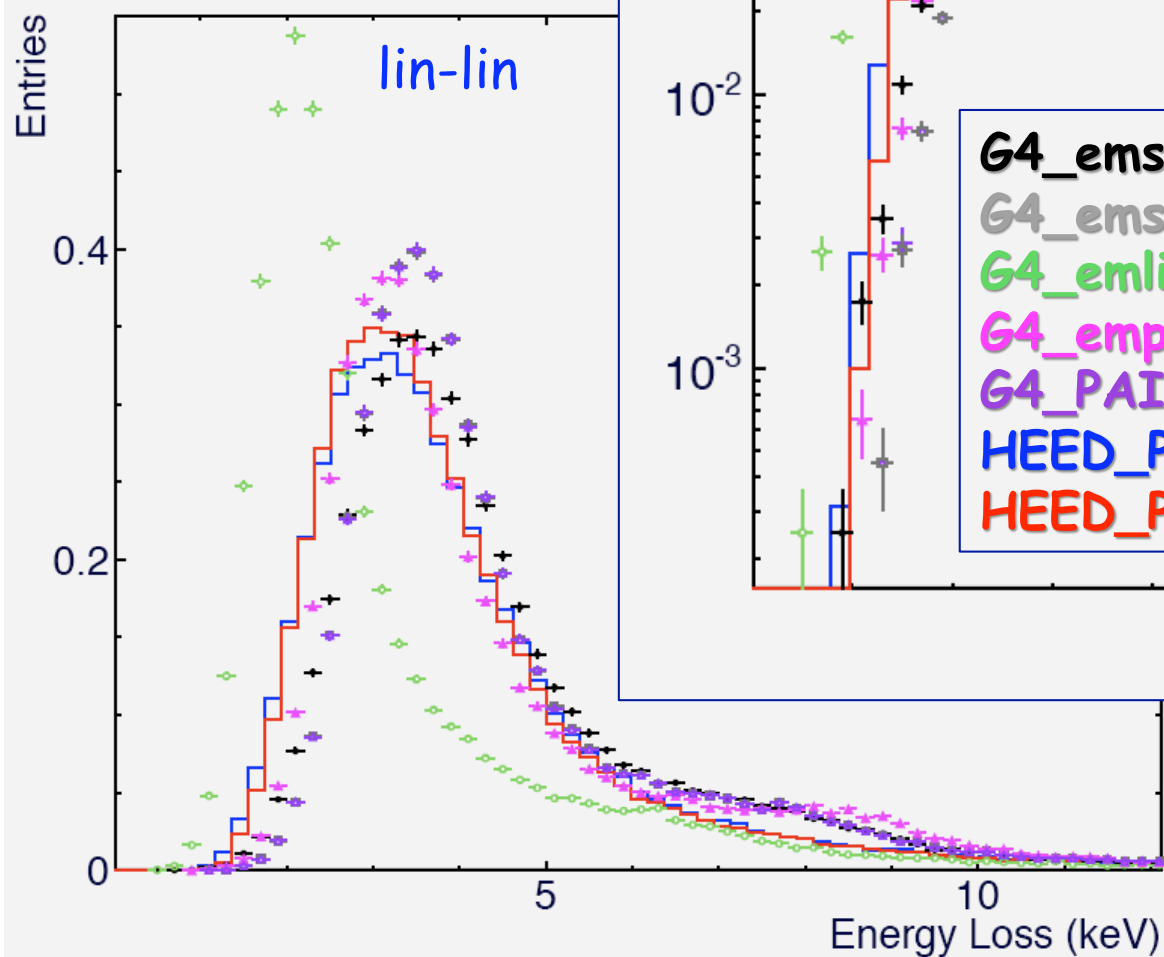

HEED: **PAI**
PAIR

Description: Ionization energy loss distribution produced by electrons with a momentum of 25 GeV/c in a gas mixture 80% Ar and 20% CO₂, with 1.5 cm thickness.

G4_HEED_25GeV_1.5cm_100kevents
