

# Introduction

Christopher Jones, Kyle Knoepfel, Attila Krasznahorkay

- We are continuing the look at how different experimental frameworks deal with in-file metadata (non-event data) in multi-threaded environments
  - Suggestions on non-LHC contributions to this topic are very welcome!

# Upcoming Event(s)

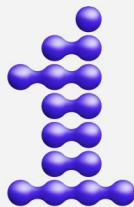

## oneAPI Developer Summit 2020

November 12-13, 2020

Join us for the first-ever summit for developers working with oneAPI, Data Parallel C++, and Intel® oneAPI Toolkits for accelerated computing across xPU architectures (CPU, GPU, FPGA, other accelerators). This two-day virtual conference will showcase innovative solutions developed on cross-architecture platforms and enables the developer community to connect with peers and share experiences and lessons learned.

Connect with your fellow developers as we build a self-sustained, vibrant community to support each other in using oneAPI and DPC++.

Save the date – registration link coming soon!
