

Plan for participation of KEK people in the LHC accelerator commissioning

Dec. 8, 2006 @ CERN-KEK Committee

K. Oide

Katsunobu.Oide@kek.jp

KEK Accelerator Lab would like to send staffs to LHC.

- LHC accelerator commissioning + R&D for upgrade.
- 6 people in 3 years (2007-2009), hopefully.
- 9-12 months per person. Cannot come back until some result is obtained...
- Mainly for people who came after startup of KEKB.
- More than 10 people have expressed positive interest on participation, but some are hesitating or looking at the performance of the first person.

Name	Speciality	When to come
Akio Morita	Optics diagnostics / correction Real-time modeling	June 2007
Kirk Yamamoto	Crab cavity Superconductivity	TBD
Hitomi Ikeda	Beam loss monitors / Streak cameras, synchrotron light monitors	TBD
John Flanagan	Synchrotron light monitors, Electron-cloud measurement	TBD
