## Introduction

- Re-installation of grid services is ongoing with the conversion to new mid-range servers.
- Discussion on CMS services will need to be resumed with new CMS management structure.
- FTS test server is being set up. This test version will become the production.
- Oracle 10.0.2.3 is in the validation environment for a week. SAM has been tested through the validation environment for SAM. FTS basic tests have been done. Upgrade is planned for January, target for week of 15<sup>th</sup> January.
- LFC/LHCb replication needed to be turned off when CNAF is down. CNAF had announced it but without sufficient notice. The procedure continues to be valid to send the information to the GMOD.
- WLCG level 1 milestones will be produced for the Tier1 sites for 2007. From Q2, Atlas and CMS will be large scale tests which are full tests from data acquisition to Tier2. Atlas are due to start in June with 4 exercises. CMS due to start in Q2. The services they need should be in place 2 months before the start date of the test. Component testing with multi-VOs should therefore be done during Q1. The residual services gLite/SLC4/64bit, distributed databases, VOMS roles, ... need to be validated and reviewed if they will be ready for the testing.

## AAS

- <https://twiki.cern.ch/twiki/bin/view/LCG/LcgScmStatusAas>
- Legacy LDAP service switch off Monday. Some VOMS/Oracle errors created problems obtaining proxies.
- Tomcat problems persist. Some sites continue to use the lcg-voms rather than voms. Maria will re-broadcast the information to use voms.cern.ch for grid map files.

## Deployment

- <https://twiki.cern.ch/twiki/bin/view/LCG/LcgScmStatusDeploy>
- 

## IS

- <https://twiki.cern.ch/twiki/bin/view/LCG/LcgScmStatusIs>
- 

## WMS

- <https://twiki.cern.ch/twiki/bin/view/LCG/LcgScmStatusWms>

- The AIM is not to create new queues but to publish through different CEs. Users will select through a tag. This needs to be announced when an official release is available along with instructions how should the different environments can be selected. Further clarification is required.

## **DMS**

- <https://twiki.cern.ch/twiki/bin/view/LCG/LcgScmStatusDms>
- Castor interventions today completed successfully.
- 

## **Experiments**

- <https://twiki.cern.ch/twiki/bin/view/LCG/LcgScmStatusExp>
- LHCb: NIKHEF tests have been successful resolving the connectivity between NIKHEF and SARA.

## **AOB**

- The EIS team would be interested to understand the Remedy assignments. We may need to split the assignments between VOs. With appropriate procedures, the sysadmins can perform standard procedures.
-
