R2M studies of radiation effects on oils and greases

Tuesday 2 February 2021 16:15 (15 minutes)

Lubrication problems in radiation areas at CERN and insufficient data for a reliable lubricant selection during design have highlighted the need to improve knowledge of radiation effects in oils and greases. R2M are preparing experimental studies to verify the radiation resistance of promising products identified via theoretical considerations and literature.

Presenters: SENAJOVA, Dominika (Ministere des affaires etrangeres et europeennes (FR)); FERRARI, Matteo (CERN)

Session Classification: Research
