

## IAS Program on High Energy Physics (HEP 2021)

Contribution ID: 56

Type: **not specified**

# Global analysis of the charged lepton flavor violation effects

Search for charged lepton flavor violation (CLFV) is one of the core elements to discover new physics beyond the SM. In this talk, I will perform a comprehensive and systematic analysis of the CLFV sensitivity at the EIC, LHC and low energy data in the framework of the SMEFT.

## Scheduling Preferences

It would be better in the morning. Thanks.
