Monitoring tools for future

Tuesday 9 February 2021 16:30 (20 minutes)

The planned transition to the new FriDAQ data format requires significant modifications of the current DAQ software. Highly affected parts include monitoring tools COOL and MurphyTV, and related DaqDataDecoding library. In the presentation, a student project aiming to facilitate the adjustment of the mentioned programs is introduced. The talk contains a summary of the initial state, a discussion of the scale of necessary changes, and an outline of further work

Presenter: SUCHOMEL, Aleš (CTU)

Session Classification: Main session
