

MT27, 27th International Conference on Magnet Technology

Thursday, 18 November 2021

THU-PO3-713 Magnetization and Field Quality I (10:00 - 12:00)

[id] title	presenter	board
[388] [Invited] Development of precise shimming technique with materials having low saturation magnetization	SASAKI, Ken-ichi	
[744] Effect on temperature dependence for long-term stable control of the magnetic field at sub-ppm using superconducting magnet for MRI	SUGITA, Moe	
[422] ITER Outer Vessel Steady-State magnetic sensor calibration	STRAUSS, Thomas	
[289] Design method of active shield coils of steering magnet for fine tuning of muon injection orbit in muon storage magnet of g-2/EDM precision measurement	Dr ABE, Mitsushi	
[391] Development of magnetic field mapping system for MuSEUM experiment with high precision using CW-NMR probes	SASAKI, Ken-ichi
